The Software Paradox Stephen O'Grady, 2015-05-18 Software is more important than ever today and yet its commercial value is steadily declining. Microsoft, for instance, has seen its gross margins decrease for a decade while startups and corporations alike are distributing free software that would have been worth millions a few years ago. Welcome to the software paradox. In this O'Reilly report, RedMonk's Stephen O'Grady explains why the real money no longer lies in software and what it means for companies that depend on that revenue. You'll learn how this paradox came about and what your company can do in response. This book covers why it's growing more difficult to sell software on a standalone basis, how software has come full circle from enabler to product and back again, the roles that open source software as a service and subscriptions play, how software developers have become the new kingmakers, why Microsoft, Apple, and Google epitomize this transition, how the paradox has affected other tech giants such as Oracle and Salesforce.com, strategies your software firm can explore including alternative revenue models.

Blockchain and the Law Primavera De Filippi, Aaron Wright, 2018-04-09 How does Bitcoin mine money from 1s and 0s? Through blockchain, a tool for creating secure decentralized peer-to-peer applications. The technology has been compared to the Internet in impact. But disintermediation, blockchain's greatest benefit, cuts out oversight along with middlemen. Blockchain and the Law urges the law to catch up.

Big Data, Data Mining, and Machine Learning Jared Dean, 2014-05-27 With big data analytics comes big insights into profitability. Big data is big business. But having the data and the computational power to process it isn't nearly enough to produce meaningful results. Big Data, Data Mining, and Machine Learning: Value Creation for Business Leaders and Practitioners is a complete resource for technology and marketing executives looking to cut through the hype and produce real results that hit the bottom line. Providing an engaging thorough overview of the current state of big data analytics and the growing trend toward high performance computing architectures, the book is a detail-driven look into how big data analytics can be leveraged to foster positive change and drive efficiency. With continued exponential growth in data and ever more competitive markets, businesses must adapt quickly to gain every competitive advantage available. Big data analytics can serve as the linchpin for initiatives that drive business, but only if the underlying technology and analysis is fully understood and appreciated by engaged stakeholders. This book provides a view into the topic that executives, managers, and practitioners require and includes a complete overview of big data and its notable characteristics. Details on high performance computing architectures for

analytics massively parallel processing MPP and in memory databases Comprehensive coverage of data mining text analytics and machine learning algorithms A discussion of explanatory and predictive modeling and how they can be applied to decision making processes Big Data Data Mining and Machine Learning provides technology and marketing executives with the complete resource that has been notably absent from the veritable libraries of published books on the topic Take control of your organization s big data analytics to produce real results with a resource that is comprehensive in scope and light on hyperbole U.S. News & World Report ,1993 Progressive Architecture ,1979 The Smart Set ,1929 HCI in Business, Government, and Organizations: eCommerce and Innovation Fiona Fui-Hoon Nah, Chuan-Hoo Tan, 2016-07-04 This volume constitutes the refereed proceedings of the Third International Conference on HCI in Business Government and Organizations HCIBGO 2016 held as part of the 18th International Conference on Human Computer Interaction HCII 2016 which took place in Toronto Canada in July 2016 HCII 2016 received a total of 4354 submissions of which 1287 papers were accepted for publication after a careful reviewing process The 53 papers presented in this volume are organized in topical sections named social media for business electronic mobile and ubiquitous commerce business analytics and visualization branding marketing and consumer behavior and digital innovation **Smart Grid Architecture and Standards** United States.
