Peptides, Synthesis, Structure, Function Daniel H. Rich, Erhard Gross, 1982 **Peptides, Synthesis, Structure, Function** Daniel H. Rich, Erhard Gross, 1981 Bioactive Polymeric Systems Charles G. Gebelein, Charles E. Carraher, 2012-12-06 The vast array of libraries in the world bear mute witness to the truth of the 3000 year old observation of King Solomon who stated of making many books there is no end and much study is a weariness of the flesh Yet books are an essential written record of our lives and the progress of science and humanity Here is another book to add to this huge collection but hopefully not just another collection of pages but rather a book with a specific purpose to aid in alleviating the weariness of the flesh that could arise from much studying of other journals and books in order to obtain the basic information contained herein This book is about polymeric materials and biological activity as the title notes Polymeric materials in the broad view taken here would include not only synthetic polymers e g polyethylene polyvinyl chloride polyesters polyamides etc but also the natural macromolecules e g proteins nucleic acids polysaccharides which compose natural tissues in humans animals and plants In the broad sense used here biological activity is any type of such action whether it be in medication pest control plant growth regulation and so on In short this book attempts to consider briefly the use of any type of polymeric material system with essentially any kind of biological activity *Diabetologie in Klinik und Praxis* Hellmut Mehnert, 2003 *Annual Reports in Medicinal Chemistry*, 1985-09-11 Annual Reports in Medicinal Chemistry **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1988 **Current Catalog** National Library of Medicine (U.S.), 1982 First multi year cumulation covers six years 1965 70 **Münchener medizinische Wochenschrift**, 1983 Peptides, Structure and Function Victor J. Hruby, Daniel H. Rich, 1983 Current Catalog, 1988 First multi year cumulation covers six years 1965 70 **Immunological Aspects of Reproduction in Mammals** D. B. Crighton, 1984 Immunological Aspects of Reproduction in Mammals contains papers presented during a symposium at the University of Nottingham Easter School The scholarly presentations provide a wealth of information on the field of reproductive immunology and indicate just how complex this field is and how many questions still remain to be answered *Biochemicals and Reagents for Life Science Research* Sigma Chemical Company, 1999 Novel Guanidinyllating Reagents and Heterocyclic Structures for Peptidomimetic Drug Design Christoph W. Advances and Technical Standards in Neurosurgery L. Symon, J. Brihaye, B. Guidetti, F. Loew, J. D. Miller, H. Nornes, E. Pásztor, B. Pertuiset, M. G. Yaşargil, 1986-12-01 As an addition to the European postgraduate training system for young neurosurgeons we began to publish in 1974 this series devoted to Advances and Technical Standards in Neurosurgery which was later sponsored by the European Association of Neurosurgical Societies The fact that the English language is well on the way to becoming the international medium at European scientific conferences is a great asset in terms of mutual understanding Therefore we have decided to publish all contributions in English regardless of the native language of the

authors All contributions are submitted to the entire editorial board before publication of any volume Our series is not intended to compete with the publications of original scientific papers in other neurosurgical journals Our intention is rather to present fields of neurosurgery and related areas in which important recent advances have been made The contributions are written by specialists in the given fields and constitute the first part of each volume In the second part of each volume we publish detailed descriptions of standard operative procedures furnished by experienced clinicians in these articles the authors describe the techniques they employ and explain the advantages difficulties and risks involved in the various procedures This part is intended primarily to assist young neurosurgeons in their post graduate training However we are convinced that it will also be useful to experienced fully trained neurosurgeons
