Political Unification Revisited On Building Supranational Communities:

Political Unification Revisited Amitai Etzioni, 2001-01-01 Can independent nations unify politically Amitai Etzioni raised this searching question in his seminal 1965 book *Political Unification A Comparative Study of Leaders and Forces* In this revised edition now with an extensive new introduction Etzioni convincingly argues that the experiment of collective self determination is the only viable replacement for a perilously overloaded international system This fascinating work debates the limitations of informal networks of governance transnational agencies and cross nation bonding including the grand experiment of the European Union to argue that only a truly transcendent supranational community can effectively succeed the nation state He doubts whether the traditional system of international relations can withstand the threat of transnational forces Old fashioned diplomacy can neither prevent weapons of mass destruction and hate material moving easily across national borders nor deal with mass cross border immigration in the wake of civil war and the rise of political and ethnic separatism *Political Unification Revisited* is essential reading for political scientists and scholars of international law and international relations seeking to navigate the path from national sovereignty to world government in the 21st century

Die Europäische Union als internationaler Akteur Bert Riehle, 2013 *Interdisziplinäre Europastudien* Ulrike Liebert, Janna Wolff, 2014-11-28 In 22 Kapiteln wird eine strukturierte Einführung in das für Europastudien relevante historische Kultur, Rechts, Sozial- und Politikwissenschaftliche Grundverständnis und optionale Spezialwissen zum Komplex Europa geboten Jeder Beitrag führt in die grundlegenden Europa-Fragen und Perspektiven der jeweiligen Disziplin ein, erläutert die zentralen Konzepte und Definitionen, nimmt Bezug auf den aktuellen Stand der Forschung und schließt mit einem Ausblick auf aktuelle Forschungsfragen

Wasserkraft im Dienst des Sozialismus Aurelia Ohlendorf, 2025-10-13 Der bekannte Assuan-Hochdamm am Nil ist nicht das einzige große Wasserkraftwerk, das mit sowjetischer Hilfe errichtet wurde Große Staudämme spielten im Kalten Krieg eine zentrale Rolle im Wettlauf der Supermächte um Partnerschaften und Einflusssphären weltweit Sowjetische Ingenieure reisten seit den ausgehenden 1950er Jahren um die Welt und beteiligten sich am Bau großer hydroelektrischer Infrastrukturen am Kabul, Afghanistan, Euphrat, Syrien, an der Donau, Jugoslawien, Rumänien und an vielen weiteren Flüssen Die Erschließung von Wasserkraftressourcen war im 20. Jahrhundert eines der zentralen Betätigungsfelder staatlich gelenkter Modernisierungsprojekte Auch in der Sowjetunion hatte die Hydroenergetik im Zentrum der forcierten Industrialisierung unter Stalin gestanden Nach Stalins Tod nahm die Bedeutung der Wasserkraft innerhalb der Sowjetunion ab und sowjetische Experten exportierten ihr Wissen und ihr technologisches Knowhow weltweit Sie engagierten sich in internationalen wissenschaftlichen Organisationen, kooperierten innerhalb des sozialistischen Lagers und boten ihr energieintensives sozialistisches Entwicklungsmodell den dekolonisierten Ländern im Rahmen wirtschaftlicher und technologischer Zusammenarbeit an

From Empire to Community Amitai Etzioni, 2025-10-16 Whether one favors the US global projection of force or is horrified by it, the question stands: where do we go from here? What ought to be the new

global architecture Amitai Etzioni follows a third way drawing on both neoconservative and liberal ideas in this bold new look at international relations He argues that a clash of civilizations can be avoided and that the new world order need not look like America Eastern values including spirituality and moderate Islam have a legitimate place in the evolving global public philosophy Nation states Etzioni argues can no longer attend to rising transnational problems from SARS to trade in sex slaves to cybercrime Global civil society does help but without some kind of global authority transnational problems will overwhelm us The building blocks of this new order can be found in the war against terrorism multilateral attempts at deproliferation humanitarian interventions and new supranational institutions e g the governance of the Internet Basic safety human rights and global social issues such as environmental protection are best solved cooperatively and Etzioni explores ways of creating global authorities robust enough to handle these issues as he outlines the journey from empire to community
