**Politics, Programs, and Budgets** James Warren Davis, 1969      *Policy and Politics in State Budgeting* Kurt M. Thurmaier, Katherine G. Willoughby, 2014-12-18 States are the key to contemporary government reform efforts in the United States but we know very little about their relative effectiveness at resource allocation and their actual capacity to absorb additional fiscal and managerial responsibilities This path breaking study examines state budget offices as institutional actors with special attentio to the role of budget examiners Drawing on empirical findings from field studies of eleven states in the American heartland the authors demonstrate how budgeting at the state level has become more policy oriented requiring complex decision making by budget analysts The incrementalist model of budgetary decision making thus gives way to a multiple rationalities model The authors illustrate the decision making model with the story of two office examiners who have distinctly different orientations as they begin their work and contrast the different decision nationalities that come into play for them at different points in a typical budget cycle The book includes a comprehensive bibliography of historical and modern writings on state budgeting operations activities and decision making state budgeting cycles and the state level policy development process      **Dictionary Catalog of the Department Library** United States. Department of the Interior. Library, 1969      **Government Budgeting and Expenditure Management** Salvatore Schiavo-Campo, 2017-02-17 The government budget should be the financial mirror of society s choices Yet most people view budgeting as the epitome of eye glazing subjects rarely explained in a way that is understandable to the non specialist and too often presented without adequate consideration of a country s governance and institutional capacity Government Budgeting and Expenditure Management fills a gap in the literature to redress these failings and does so in comparative international perspective This book provides a comprehensive but pithy and easy to understand treatment of public financial management taking into account a variety of special issues including budgeting in post conflict situations at subnational government levels for military security expenditures and in countries with large extractive revenues Distilling the lessons of budgeting reform in countries at different levels of income and administrative capacity each chapter gradually progresses from the basic principles to the more technical aspects and then on to implementation issues using concrete examples and illustrations from around the globe Government Budgeting and Expenditure Management is ideally suited as the primary text for advanced undergraduate or graduate courses in government budgeting or public financial management or as a supplementary text for courses in public finance public economics economic development public administration or comparative politics With its attention to practical implementation aspects the book will also be of direct interest to practitioners policy makers and government employee training organizations      中国大学图书馆丛刊 Chinese University of Hong Kong, 1979      **Program Budgeting** Mary A.
