Politics Projects And People Institutional Development In Haiti:

Politics, Projects, and People Derick W. Brinkerhoff, Jean Claude García Zamor, 1986 Research report institution building institutional framework for economic and social development Haiti theoretical aspects political aspects obstacles community development community participation rural area health service role of USA development project agroforestry slum urban renewal development policy implications Diagrams references statistical tables *Political Economy in Haiti* Simon M. Fass, 2020-02-13 This important study introduces the conceptual premise that families like firms analyze their circumstances make decisions and pursue courses of action on the basis of what they perceive to be the most efficient methods for producing and reproducing survival Combining this premise with an extraordinary assemblage of facts gleaned over the period of a decade from the streets markets and homes of Port au Prince the author weaves a tapestry of despair and hope which only an unusual degree of intimacy with the details of everyday life in the city could provide The result is a considerable deepening of understanding about the politics and economics by which family members earn their livelihoods distribute resources within and between households produce life and labor from food and water provide shelter and schooling for themselves and borrow money to finance these and other activities These different dimensions of daily existence form a web of interdependency in which change in any one dimension causes change in all the others As Professor Pass's work demonstrates research and development assistance practices of public and private organizations in such areas as employment health housing education and credit are often irrelevant This is because they are necessarily guided by prevailing concepts and theories with respect to the circumstances of the urban poor which sometimes do the poor considerable disservice With the additional insight provided by a decade of participation in the design of policies programs and projects serving as a tempering influence the author does not leap to easy criticism of prevailing views and practices He notes that ideas and interventions change in response to new understanding sometimes in ways that the producers of such understanding could never have imagined The problem is that change is painfully slow and in desperately poor countries like Haiti waiting for change exacts an almost intolerable price from the poor This book is a provocative yet highly original contribution which will require serious attention from scholars and practitioners of development Appearing as it does soon after the great seaward exodus of Haitians and urban unrest culminating in the flight of the Duvalier family this timely volume will provide illumination for those seeking to understand the circumstances that press people to risk all in the name of survival Politics or Markets? Mats Lundahl, 2002-01-31 First published in 1992 Routledge is an imprint of Taylor Francis an informa company **The History of Haiti** Steeve Coupeau, 2007-12-30 Haiti's long and turbulent history is documented in this comprehensive reference volume ideal for high school students undergrads and general readers Discovered by Christopher Columbus on his journey across the Atlantic in 1492 Haiti has had a tumultuous past at best Epidemics revolutions slavery and poverty have plagued this small Latin American country for centuries and even today its

unstable government has prevented Haiti from becoming a popular Caribbean tourist destination This volume of the Greenwood Histories of the Modern Nations series explores Haiti's bloodied past beginning with Spanish French Dutch and British attempts at colonization up until today's coups and political uprisings The History of Haiti is the perfect addition to any high school public or undergraduate library Haiti and the United States Brenda Gayle Plummer, 1992 Stressing the importance of domestic policy and the character of civil society in the formation of foreign policy Plummer illuminates the various factors that figured in the relationship between the two countries throughout the nineteenth century She discusses the aspirations of Haiti's founders in building a self governing black society Haitian responses to the transatlantic abolition movement the development of Haiti's creole culture and the country's shrewd negotiations with the United States over commercial and strategic issues The late 1800s Plummer shows proved a turning point in Haitian U S relations as Washington's assumption of regional hegemony changed the balance of power for a Haiti long committed to a multilateralist diplomacy In the twentieth century tensions between traditional and reformist elements in Haitian society erupted in a crisis that brought U S intervention and long term military occupation Plummer examines the consequences of this intervention as they were incorporated into the later interactions between the United States and Haiti and shows how these troubled relations contributed to the rise of the repressive Duvalier regime The recent fall of that regime Plummer suggests now presents the psychological moment to which Elihu Root referred so many years ago Missions for Science David McBride, 2002 Missions for Science traces the development and transfer of technology in four Atlantic regions with populations of predominantly African ancestry the southern United States the Panama Canal Zone Haiti and Liberia David McBride explores how the pursuit of the scientific ideal and the technical and medical outgrowths of this pursuit have shaped African diaspora populations in these areas asking What specific technologies and medical resources were transferred by U S institutions to black populations centers and why How did the professed aims of U S technical projects public health and military activities differ from their actual effects and consequences Did the U S technical transfer amount to a form of political hegemony What lessons can we learn from the history of technology and medicine in these key geographic regions Missions for Science is the first book to explain how modern industrial and scientific advances shaped black Atlantic population centers McBride is the first to provide a historical analysis of how shifting environmental factors and disease control aid from the United States affected the collective development of these populations He also discusses how independent black Atlantic republics with close historical links to the United States independently envisioned and attempted to use science and technology to build their nations *Abstracts on Rural Development in the Tropics*, 1988 **Social Capital and Development in Haiti** Glenn R. Smucker, 1999 *Multilateral Cooperation for Development in the Twenty-first Century* Peter Hall, 1993 *The Journal of Developing Areas*, 1991 **Forest Patches in Tropical Landscapes** John Schelhas, Russell S. Greenberg, 1996-04 While tropical forests are being cleared at an alarming rate the

clearing is rarely complete and is often not permanent A considerable amount of tropical forest exists as remnants that have significant value both for the conservation of biological diversity and for meeting the needs of local people This volume brings together world renowned scientists and conservationists to address the biological and socio economic value of forest remnants and to examine practical efforts to conserve those remnants An outgrowth of a year long study by the policy program at the Smithsonian Migratory Bird Center Forest Patches in Tropical Landscapes provides a broad overview of theory and practice and will help foster both interdisciplinary research and more effective approaches to tropical conservation and development

Institutional Sustainability in Agriculture and Rural Development Derick W. Brinkerhoff,Authur A. Goldsmith,1990-09-25 Throughout the global community the challenges of finite resources budget deficits and growing interdependence and complexity have forced governments and the private sector to do more with less In the foreign assistance realm this has translated into a donor mandate to promote self sustaining development in the Third World a key component of which is the institutional framework that conceives plans funds implements and manages activities This book based on the results of a multi year applied research project focuses on institutional sustainability and its role in agriculture and rural development It concentrates on collaboration between international donor organizations and developing countries to design and implement projects aimed at introducing performance and capacity improvements The collection of fifteen essays is divided into three subject areas Part one examines the sustainability dimensions of agriculture and rural development with chapters that focus on the range of meanings of sustainability and the relationship between it and continued benefit flows a conceptual model that draws on systems theory organizational contingency theory and political economy and the action research methodology for applying the model in the field Part two is made up of nine chapters each of which uses the model to analyze a particular case where an international donor funded intervention sought to develop a sustainable institution The cases range geographically across the world Finally part three draws on the case experiences to highlight strategies for promoting institutional sustainability Lessons are derived from a comparative analysis of several of the cases and a chapter incorporating the points made in all of the cases is also provided With its comparative framework and conclusion that institutional sustainability is a feasible objective for development agencies this volume will be an important work for development practitioners and students of development administration as well as a significant addition to public and academic library collections
