If...Then Taina Bucher, 2018-06-05 We live in a world in which Google's search algorithms determine how we access information Facebook's News Feed algorithms shape how we socialize and Netflix collaborative filtering algorithms choose the media products we consume Rather than looking at how technologies shape or are shaped by political institutions this book is concerned with the ways in which informational infrastructure may be considered political in its capacity to shape social and cultural life Setting out to explore both the specific uses of algorithms and the cultural forms they generate this book offers a novel understanding of the power and politics of algorithmic life as grounded in case studies that explore the material discursive dimensions of software

The Tech-Media Hybrid Qun Wang, 2025-12-23 Google is typically thought of as a tech giant and the world's largest search engine but it was also among the first tech companies to invest in news After 9 11 the company recognized the economic and social value of up to the minute information and began to incorporate news into its business Google News built on automation algorithms aggregation and the unbundling and rebundling of news and Google's other news related initiatives went on to play a major role in shaping the information ecosystem of the twenty first century In *The Tech Media Hybrid* Qun Wang examines Google's engagement with news across more than two decades tracing the company's complicated relationship with the news industry She shows how Google

developed a push and pull relationship with the media sector boosting its visibility while also competing against it and establishing new norms. What the company calls the Google way of experiencing news has exerted a profound influence on traditional media. Google's news ambitions in turn have been shaped by the global news industry's actions and reactions at every step. Shedding new light on the vast transformations of the past quarter century, this multimethod interdisciplinary book also offers insight into how the news environment might evolve in the era of AI.

The Tyranny of the Majority Tamás Nyirkos, 2018-01-29. Tamás Nyirkos provides a timely and essential reassessment of the concept of the tyranny of the majority for the study of democracy today. The analysis is divided into three parts: the first discusses the prehistory of majority tyranny; the second reviews the elements of the standard theory in the modern era; while the third deals with the current postmodern challenges to the prevailing order of liberal democracy. Combining different elements of theories dating from the Middle Ages to the present, Nyirkos theorizes that while the term 'the tyranny of the majority' may be misleading, the threat that tyrannical governments justify themselves by reference to the majority will remain with us for the foreseeable future. He shows how some of the greatest political philosophers of the past, democrats and antidemocrats alike, shared the same fears about the majoritarian principle. The Tyranny of the Majority will offer all those who read it a better understanding of what is meant, not only by this term but also by related terms like democratic despotism, populism, or illiberal democracy. It will be of interest to scholars of politics and international relations, political philosophy, political theology, and intellectual history.
