The Meaning of Myth in Uncertain Times Evelien Bracke, 2025-12-29 This book examines how ancient mythology forms part of the stories we tell ourselves about today s uncertain times not only in popular culture but also in sociocultural and political debates It particularly explores the ways in which classical myths shape how our modern secular societies think about the interconnected geopolitical technological and ecological issues we are facing and our potential futures Classical myths like those of Achilles Medea and Odysseus are everywhere from films and novels to social media and games But how and why are we still fascinated with them particularly now Can these strange and often painful stories from societies so radically different from our own offer us genuine insights today This expanded English edition of Evelien Bracke s award winning Dutch book Leidraad door het labirint explores how and why Greek and Roman myths despite their ancient origins are surprisingly meaningful in these times of uncertainty Bracke offers a contextualization and literary analysis of classical mythology looking at both texts and visual media This allows readers to gain a better understanding of how people draw inspiration from the past in their attempt to create a better future and how these stories provide both collective and individual guidance in navigating the turbulent 21st century The Meaning of Myth in Uncertain Times is suitable for students scholars teachers and general readers interested in mythology and ancient Greek and Roman history and culture providing insights that are relevant to the challenges we all face today

Federation over the Web Klaus P. Jantke, Aran Lunzer, Nicolas Spyrtatos, Yuzuru Tanaka, 2006-01-19 The lives of people all around the world especially in industrialized nations continue to be changed by the presence and growth of the Internet Its influence is felt at scales ranging from private lifestyles to national economies boosting the pace at which modern information and communication technologies influence personal choices along with business processes and scientific endeavors In addition to its billions of HTML pages the Web can now be seen as an open repository of computing resources These resources provide access to computational services as well as data repositories through a rapidly growing variety of Web applications and Web services However people's usage of all these resources barely scratches the surface of the possibilities that such richness should offer One simple reason is that given the variety of information available and the rate at which it is being extended it is difficult to keep up with the range of resources relevant to one's interests Another reason is that resources are offered in a bewildering variety of formats and styles so that many resources effectively stand in isolation This is reminiscent of the challenge of enterprise application integration familiar to every large organization be it in commerce academia or government The challenge arises because of the accumulation of information and communication systems over decades typically without the technical provision or political will to make them work together Thus the exchange of data among those systems is difficult and expensive and the potential synergetic effects of combining them are never realized

Social Community Sites as the Trend in Web 2.0. How to Beat the Competition Alexander Roggenkamp,2016-01-04 Master s Thesis from the year 2009 in the subject Business economics Offline Marketing and Online Marketing grade 1 5 University of Applied Sciences Essen language English abstract Since a few years many people talk about web 2 0 without knowing exactly what it is It is not a new web standard no new innovative product of Apple no net movement or revolution In fact it is a paraphrase for the new active role of users The technological progress makes it possible that users participate in internet actively Their role changed from a watching to a creating one New tools and features enabled users to generate content With other new websites social community websites came up using these new possibilities By now social communities like Facebook or studiVZ have millions of members The huge acceptance on users side made those websites a real trend in web 2 0 The huge number of users makes social communities to an interesting business Experts say that social communities are not only a trend but also an important business in future Although there are already some established companies acting on the market for social communities the market will see a lot of new social communities in the next years There are only a few general social communities dividing up the market And there are enough topics which are not occupied as yet Only those social communities will beat the competition and will remain which are able to generate revenue and profit

Memes in Frame-Semantic Perspective Niels Brause,2017-03-07 Bachelor Thesis from the year 2016 in the subject English Language and Literature Studies Linguistics grade 1 3 University of Duisburg Essen Department of Anglophone Studies language English abstract One cannot escape them because they are everywhere There is scarcely a day without one coming across them They are a humorous picture a witty message or a funny video you find on the internet They are in our newsfeed on our message boards or in personal messages from our friends These sources of entertainment seem to be by now an important element of today s web society and there is a huge number of image boards like 9gag com or reddit com which have no other purpose than satisfying our needs for these sources of entertainment Even a growing number of newspapers have started to include this type of content in their online platforms A term that is often used to describe this accumulation of different visual entities is the term memes but this term is vague and ambiguous and it does not specifically say what kind of phenomena are included in it This bachelor thesis is an attempt to establish these phenomena labelled as memes as valuable objects for linguistic studies It will glance at several linguistic theories and check their relevance for analysing image macros as representatives for memes in general Finally it will analyse image macros by using the frame semantic framework thus integrating the former accomplished insights in one theoretic framework with only a few central terms This will support the thesis that frame semantics is capable of describing the patterns of encyclopaedic knowledge needed in order to understand complex bimodal

Waves of Change Patrick Callioni,2010 Written in the middle of a global economic crisis this book is about a better future Patrick Callioni identifies and describes the major waves of change that are coming our way over the next decade or so and then provides practical advice on what to do or avoid doing to benefit most or suffer least from what is to come He describes some of the problems with the present regime of regulation We are regulating to catch the motes of dust floating in the air rather than the beams that end up poking out the eyes of our financial markets and suggests regulation should focus on rewarding the good rather than punishing the bad He also analyzes some of the behavior that helped to create the Credit Crunch They took healthy debt mortgage debt that was likely to be repaid mixed it up with toxic debt mortgage debt not likely to be repaid and then sold the debt on as prime safe debt creating untold damage Then he presents the waves of change that are coming the challenges of new technologies the business opportunities opened by reactions to climate change and demographic changes as workers and managers are no longer predominantly baby boomers He also warns of future signs of impending financial setbacks that should be avoided A financial crisis will occur only when the fuel is there in the form of an investment bubble In his previous book Compliance and Regulation in the Financial Services Industry Patrick Callioni successfully predicted most of the course of the current economic downturn Over regulation is as dangerous as under regulation so he proposes the creation of a federated network of trust Throughout this exciting book he emphasizes the increasing importance of knowledge capital value that is not captured by existing accounting standards and in particular soft intangibles knowledge assets time assets motivational assets etc and he proposes guidance on their measurement and profitable management **Dictionnaire technologique** Ernst Roehrig,1887 **Factsheet Five** ,1993 **Der**
