- Internet is accessible to every user all over the world.

Internet Evolution

The concept of Internet was originated in 1969 and has undergone several technological & infrastructural changes as discussed below:

- The origin of Internet devised from the concept of **Advanced Research Project Agency Network ARPANET**.
- **ARPANET** was developed by United States Department of Defense.
- Basic purpose of ARPANET was to provide communication among the various bodies of government.
- Initially, there were only four nodes, formally called **Hosts**.
- In 1972, the **ARPANET** spread over the globe with 23 nodes located at different countries and thus became known as **Internet**.
