Ip, 2022-10-20 This book provides an accessible introduction to the emerging field of behavioral public choice economics and the law This field studies how public officials lawmakers and judges fall prey to their own biases and heuristics and how constitutions and judicial doctrines can be structured to mitigate these cognitive shortcomings Written lucidly in plain language this book is invaluable to all students scholars and general readers interested in behavioral economics law and economics and political economy

Economic Crisis and Policy Choice Joan M. Nelson, 1990-03 The acute economic pressures of the 1980s have forced virtually all of Latin America and Africa and some countries in Asia into painful austerity programs and difficult economic reforms Scholars have intensively analyzed the economics of this situation but they have given much less attention to the political forces involved In this volume a number of eminent contributors analyze the politics of adjustment in thirteen countries and nineteen governments drawing comparisons not only across the full set of cases but also within clusters selected to clarify specific issues Why do some governments respond promptly to signs of economic trouble while others muddle indecisively for years Why do some confine their response to temporary macroeconomic measures while others adopt broader even sweeping programs of reform What leads some countries to experiment with heterodox approaches while most however reluctantly pursue orthodox courses Why confronted with intense political protest have some governments persisted while others have altered or abandoned course The answers to these questions are political not economic and they are examined here by Thomas M Callaghy Stephan Haggard Miles Kahler Robert R Kauman Joan M Nelson and Barbara Stallings
