Queer Science The Use And Abuse Of Research Into Homosexuality:

Queer Science Simon LeVay, 1996-05-14 What makes people gay lesbian bisexual or heterosexual And who cares
Written by one of the leading scientists in the research of sexual orientation Queer Science looks at how scientific discoveries about homosexuality influence society's attitude toward gays and lesbians beginning with the theories of the German sexologist and gay rights pioneer Magnus Hirschfeld and culminating with the latest discoveries in brain science genetics endocrinology and cognitive psychology

Queer Science Former Associate Professor Simon LeVay, Ph.D., 2014-05-13 What makes people gay lesbian bisexual or heterosexual And who cares These are the twin themes of Queer Science a scientific and social analysis of research in the field of sexual orientation Written by one of the leading scientists involved in this research it looks at how scientific discoveries about homosexuality influence society's attitude toward gays and lesbians beginning with the theories of the German sexologist and gay rights pioneer Magnus Hirschfeld and culminating with the latest discoveries in brain science genetics and endocrinology and cognitive psychology Research into homosexuality exemplifies both the promise and the danger of science applied to human nature LeVay argues that the question of causation should not be the crucial issue in the gay rights debate but that science does have an important contribution to make It can help to demonstrate that the traditional and still prevalent view of homosexuality as a mere set of behaviors that anyone might show is inadequate and that gays and lesbians are in a real sense a distinct group of people within the larger society with a privileged insight into their own natures

The Quest for the Inner Human Steven H. Propp, 2013-12-03 Psychology means the study of the soul it is the social science concerned with investigating who we are why we have certain feelings and why we do the things we do Are we no more than a vast assembly of nerve cells and their associated molecules Is biology our genetic inheritance destiny or does social upbringing play a crucial role What are the roles played by Nature and by Nurture Are we purely physical beings or is there an aspect that can be called spiritual This thought provoking novel takes you on a journey of intellectual and emotional exploration considering along the way questions that we've all asked ourselves such as Is it true

that we only use 10% of our brains Does playing classical music for infants increase their intelligence Do crime rates go up during a full moon Can hypnosis or post hypnotic suggestions make us do something we wouldn't normally do Does subliminal advertising influence us to buy products Are our memories stored indelibly almost like a tape recorder What causes memory lapses as we age Can repressed traumatic memories be recovered through hypnosis Do some people have multiple personalities How can I tell if someone has a neurosis or a psychosis Do men have an inner feminine side and women an inner masculine Are there innate psychological differences between males and females The four main characters in this book will guide you through a diverse and sometimes bewildering world of differing approaches to answering such questions such as Freudian Jungian and Adlerian Humanistic Existential and Transpersonal as well as Cognitive Emotive and Behaviorist Along the way you will learn about the developmental stages proposed by psychologists such as Erikson Kohlberg Piaget and Fowler and even explore some of the questions currently being asked by both neuroscientists and philosophers of the mind Start reading to begin your study of our innermost selves
