*Queer Correctives* Vincent Pak, 2025-07-24 *Queer Correctives* explores Christian discourses of sex and sexuality in Singapore to argue that metanoia the theological concept of spiritual transformation can be read as a form of neo homophobia that coaxes change in the queer individual In Singapore Christian discourses of sex and sexuality have materialised in the form of testimonials that detail the pain and suffering of homosexuality and how Christianity has been a salve for the tribulations experienced by the storytellers This book freshly engages with Michel Foucault's posthumous and final volume of *The History of Sexuality* by revitalising his work on biblical metanoia to understand it as a form of neo homophobia Drawing on Foucauldian critical theory and approaches in discourse studies it shows how language is at the centre of this particular iteration of neo homophobia one that no longer finds value in overt expressions of hate and disdain for those with non normative sexualities but relies extensively on seemingly neutral calls for change and transformation in personal lives *Queer Correctives* takes Singapore as a case study to examine neo homophobic phenomena but its themes of change and transformation embedded in discourse will be relevant for scholars interested in contemporary iterations of Foucault's concepts of discipline and technologies of the self Together with interview data from religious sexual minorities in Singapore it captures a burgeoning form of homophobic discursive practices that eludes mainstream criticism to harm through change and transformation

**Language and Gender in the Military** Edith A. Disler, 2008 In the thirty year history of the study of language and gender theory and application have branched incrementally like the reaches of a family tree The study of language and gender has progressed from an eye opening review of differences between the language of women and men to observations that language served to preserve domination of one sex over another and on to a cross cultural approach which observes that the ritual styles of talk that are observed among even the youngest girls and boys at play remain with them as women and men Language and gender has been studied in many institutional and organizational environments including medical legal law enforcement academic and business settings While all of those settings have historically been marked by gender based differentials in opportunity pay and power one of

the most metaphorically and demographically gender differentiated institutions has remained unexamined in the sociolinguistic literature the military The military is particularly interesting for linguistic study because it is veritably synonymous with the socio cultural construction of American masculinity and therefore a fascinating venue for the study of language gender and power With this innovative study the author opens the door to considerations of power gender dynamics and language and ideology in a community that has not yet been studied using the techniques of discourse analysis And while some have criticized the utility of examining outlying cases particularly in studies of gender or sexuality in language the military community though not studied can hardly be considered an outlying case On the contrary American military identity is part of American identity in that it influences the American masculine construct and has affected 26 million veterans and their families as well as those who may not be in the military but work with and near military members and installations on a regular basis Also unique to this study and the author s analysis of the usage of ma am and sir is an approach which does not necessarily examine how women and men use language but how those in their community use language to address them as women and men This landmark book provides a refreshing perspective on gender and language dynamics in a setting not yet examined Language and Gender in the Military will be a vital resource for those in gender and language studies Slang and the Struggle Over Meaning : Race, Language, and Power in Brazil Jennifer Roth-Gordon,2001
