James Kinnear, Stephen Sewell

Rusrubian Soviet Tanks:

Russian and Soviet Tanks 1914-1941 Maximino Argüelles Martinez,2014-02-17 About the evolution of the Soviet offensive doctrine during World War II Where did this doctrine and armored formations that takes practice arise Why was the USSR as a nation which in 1940 developed a tank as advanced as the T 34 100 pages trying to answer these and other questions with a description of the principal armored vehicles and the formations in which were integrated from its beginnings in the Russian Empire until June 22 1941

Russian Tanks of World War II Tim Bean,Will Fowler,2002 At the start of the campaign on the Eastern Front in the earliest days of Operation Barbarossa it was the German armour that swept all in front of it as the Wehrmacht drove eastwards in an unrelenting advance on Leningrad Moscow and Stalingrad The ill prepared and under resourced Russian forces were forced to retreat Gradually the balance of the war swung in favour of the Russian forces whose strength both in numbers and equipment proved decisive in the ultimate defeat of the German forces in the east Critical in the Soviet victory was its armour tanks such as the T 34 proving the equal if not better than some of the tanks available to the Germans This authoritative history of the Soviet forces before and during World War 2 reveals the development of their tactics in the early post revolutionary era right through to the ultimate victory in Berlin in May 1945 The dramatic struggle of the tank crews against the German advance is told through some 200 contemporary photographs many of which have never been seen before The photographs include images of tank training in the 1920s and 1930s on active service and many compelling pictures from some of the major tank battles of the day Over the past five years aided by the opening up of archives in Russia previously closed to western experts there has been a massive growth in interest in the events that occurred on the Eastern Front Russian Tanks is an important addition to the literature currently available exploring as it does the vitally important Soviet armour of the period

Soviet T-55 Main Battle Tank James Kinnear,Stephen Sewell,2019-09-19 A highly illustrated study of the T 55 Main Battle Tank and its variants that formed the backbone of the Soviet Army during the years of the Cold War The T 55 is one of the most iconic weapons created by the Soviets during the Cold War and also one of the most widely deployed weapons in history Like its younger brother the T 54 the T 55 enjoyed a long career in the Red Army and even into the early days of the reformed Russian Army Under their control it saw very little combat use or deployments but it was widely sold to other nations and participated in many of the wars and combat operations from the mid 1960s to the present The T 55 has been employed in almost every conflict in the Middle East and Africa from its introduction into service Even today the tank is still employed by both sides in the Syrian Civil War and they are also in service with Kurdish forces in the struggle against ISIS in the northern part of Iraq Containing more than 400 stunning contemporary and modern photographs and written by two experts on Soviet armour this authoritative book tells the complete story of the T 55 one of the most widely produced tanks of all time

Soviet Tanks in Combat, 1941-1945 Steve Zaloga,1997

Tanks of the USSR, 1917-1945 Alexander Ludeke,2017-11-30 The Soviet

Union had already begun building an armored industry as early as the 1920s Although initially limited to reconstructing and developing Western European armored vehicles an independent line of powerful and easy to produce models had been established by 1939 Even after the Second World War the USSR expanded its armament force considerably even planning to cross western Europe in a massive armoured wave in the event of any conflict with NATO In this book Alexander Ldeke looks at all the important Soviet tanks that were built from 1917 up until the end of the Second World War **T-90 Standard**

Tank Steven J. Zaloga, 2018-02-22 In the wake of the T 72 tank s poor performance in the 1991 Gulf War the Kremlin instructed the Russian tank industry to drop the discredited T 72 designation in favour of the T 90 Vladimir The T 90 was in fact a further evolution of the T 72 family but the name change represented an important break in Russian Soviet tank design history The T 90 has become the principal export tank of Russia and is in service in large numbers in many countries including Algeria India and many of the former Soviet republics Using detailed illustrations and full colour artwork this book will also describe the evolution of the T 90s many failed successors including the little known Bokser Molot and T 95 as well as its likely successor the new T 14 Armata and the wide range of specialized vehicles based on the T 90 chassis such as the formidable Terminator tank support vehicle *Soviet T-10 Heavy Tank and Variants* James Kinnear, Stephen

Sewell, 2017-06-29 A highly illustrated study of the T 10 Heavy Tank that served from the 1950s through to the end of the Soviet Union When it was introduced into service in 1953 the T 10 represented a return to the classic Soviet heavy tank Although considered a major threat to NATO tank forces it also represented the end of an era All gun heavy tanks like the T 10 would eventually be made effectively redundant by later models like the T 62 which had powerful next generation armament and new ammunition types The tank was gradually withdrawn from service in the 1970s though the last tanks would only leave Russian service by decree of the President of the Russian Federation in 1997 As such the T 10 outlived the Soviet state that had created it Never exported outside of the Soviet Union and rarely used in combat the T 10 has remained a mysterious tank with many of its variants unknown in the West until very recently This study written from original Russian and Ukrainian primary source documents that have only recently been made available uncovers the history of this enigmatic tank using 130 stunning contemporary and modern photographs of the T 10 as well as full colour side view artwork

Russian Tanks of World War 2 John Milsom, Steve Zaloga, 1977 *T-80 Standard Tank* Steven J. Zaloga, 2011-10-20

The Soviet T 80 Standard Tank was the last tank fielded before the Soviet collapse and the most controversial Despite having the most sophisticated fire controls and multi layer armor ever fielded on a Soviet tank its turbine power plant rather than a conventional diesel remained a source of considerable trouble throughout its career Steven J Zaloga charts the little known history of the T 80 covering the initial construction through the development to the subsequent variants the T 84 and Russia s enigmatic Black Eagle Tank Accompanying detailed cut away artwork illustrates the unusual design features that made the T 80 so controversial **Russian Tanks, 1900-1970** John Milsom, 1971 *Soviet Tanks and Combat Vehicles of World*

War Two Steve Zaloga, James Grandsen, 1984 *Indhold Soviet Armour of the Great Patriotic War 1941 to 1945* bl a med kapitler om Soviet tank design on the eve of war Organization of the Soviet Armoured Force The summer catastrophe The T 34 medium tank Light tanks Tank unit organization The KV heavy tank Mechanized artillery development Katyusha rocket launchers The SU 76 light mechanized gun The SU 122 medium mechanized gun The KV 7 mechanized gun Mechanized artillery units The German response Tank destroyers The Battle of Kursk Orel The T 34 85 medium tank The IS 2 heavy tank Heavy assault gun Light mechanized guns Tank destroyers of 1944 The T 44 medium tank The K 90 amphibious tank Light fighting vehicles Airborne fighting vehicles Engineer tanks Flame thrower tanks Armoured recovery vehicles Bridging tanks Anti aircraft vehicles Artillery transporters Armoured trains Lend lease tanks Lend lease armoured vehicles supplied to the Soviet Army Soviet tanks in retrospect Desuden er der oversigt over produktionen af sovjetiske kampvogne under krigen og Soviet Armoured Corps Order of Battle 1942 1945 **T-80 Standard Tank** Steven J. Zaloga, 2011-10-20 The history of the little known yet controversial T 80 and its subsequent variants The Soviet T 80 Standard Tank was the last tank fielded before the Soviet collapse and the most controversial Despite having the most sophisticated fire controls and multi layer armor ever fielded on a Soviet tank its turbine power plant rather than a conventional diesel remained a source of considerable trouble throughout its career Steven J Zaloga charts the little known history of the T 80 covering the initial construction through the development to the subsequent variants the T 84 and Russia s enigmatic Black Eagle Tank Accompanying detailed cut away artwork illustrates the unusual design features that made the T 80 so controversial

Russian Tanks and Armored Vehicles, 1946-to the Present Fred Koch, 1999 After World War II Russian tank development continued to strive for dominance on numerous fronts This book accounts for all of the Russian and USSR armored vehicles developed just prior to the end of the Second World War to the present Each models specifications and data as well as developmental history are given in comprehensive text and numerous photos of striking detail This book is a superb reference for historians and modellers **Russian Tanks and Armored Fighting Vehicles, 1917-1945** Wolfgang

Fleischer, 1999 This book describes in excellent detail and striking photos many unpublished the development and amassing of Russias armored vehicles from World War I through World War II Included in this text are those models that did not make it to production and also the history behind Russias tank development including the numerous foreign models that it based its designs on This book is a superb reference for historians and modellers *Soviet T-54 Main Battle Tank* James

Kinnear, Stephen Sewell, 2018-11-29 A highly illustrated study of the T 54 Main Battle Tank and its variants that formed the backbone of the Soviet Army during the years of the Cold War The menacing silhouette of the T 54 tank prowling down streets of Eastern European capitals or roaring across fields in massive exercises remains one of the most enduring images of Soviet power in the early years of the Cold War Its sleek and unmistakable shape was a warning to any nation that wanted to stand against the USSR Yet all of this masked a flawed outdated design and when T 54s began to clash with the Western

armoured vehicles in proxy wars in Southeast Asia and the Middle East they were found to be on the losing side of many of the battles. Containing over 500 stunning contemporary and modern photographs and written by two experts on Soviet armour, this authoritative book tells the complete story of the T 54, one of the most widely produced tanks of all time, including many previously unheard of variants. **Soviet Cold War Weaponry** Anthony Tucker-Jones, 2015-05-20. The T 54, T 62 and T 72 main battle tanks, along with the personnel carriers, assault guns, self-propelled guns and anti-tank missiles that are illustrated in this photographic history, represent the high point in the design and manufacture of armoured vehicles by the Soviet Union during the Cold War. Although the superpowers never came to blows, the Cold War was far from cold as numerous hot proxy wars were fought in Africa and the Middle East and these conflicts employed the Soviet weaponry that is shown in action in the colour and black and white photographs selected for this book. Between the 1950s and 1980s, Soviet and Warsaw Pact countries produced thousands of tanks and armoured vehicles ready for the Third World War. They embarked on a technological arms race with the NATO allies in an attempt to counter each new piece of equipment as it appeared in service. Much of this Soviet weaponry has achieved almost iconic status and despite its age remains in service with armies, guerrilla forces and terrorist organizations around the world today. It is also of enduring interest to collectors, reenactors and modellers who are fascinated by the military equipment of the late twentieth century. **Soviet Lend-Lease Tanks of World War II** Steven J. Zaloga, 2017-06-29. The Red Army suffered such catastrophic losses of armour in the summer of 1941 that they begged Britain and the United States to send tanks. The first batches arrived in late 1941, just in time to take part in the defence of Moscow. The supplies of British tanks encompassed a very wide range of types, including the Matilda, Churchill and Valentine, and even a few Tetrarch airborne tanks. American tanks included the M3 Stuart light tank and M3 Lee medium tank and the M4 Sherman tank, which became so common in 1944-45 that entire Soviet tank corps were equipped with the type. With these Western tanks, the Soviets were finally able to beat back the German tide in the East. This study examines the different types of tanks shipped to the Soviet Union during the war, Soviet assessments of their merits and problems, and combat accounts of their use in Soviet service, using full colour artwork, contemporary photographs and detailed cut away illustrations. **Red Steel** Russell Phillips, 2013-04. The Cold War never heated up, but if it had, the Soviet Union was ready. This reference work details 73 major Soviet war machines, from the 2P26 Baby Carriage, a deceptively light Jeep-like vehicle mounting four anti-tank missiles, to the T 80U main battle tank with its advanced armour and electronic countermeasures. Sixty-one photographs and drawings illustrate the work, and access to a web gallery with even more illustrations is included in the purchase. **Tanks of the USSR 1917-1945** Alexander Ludeke, 2018-01-23. The Soviet Union had already begun building an armoured industry as early as the 1920s. Although initially limited to reconstructing and developing Western European armoured vehicles, an independent line of powerful and easy-to-produce models had been established by 1939. Even after the Second World War, the USSR expanded its armament force considerably.

even planning to cross western Europe in a massive armored wave in the event of any conflict with NATO In this book Alexander L deke looks at all the important Soviet tanks that were built from 1917 up until the end of the Second World War

T-34 Medium Tank (1939-1943) Mikhail Baryatinskiy, 2007 This is the fourth title in our new Russian Armour series which has been designed to provide much needed authoritative information on the classic Soviet tank designs of the 20th century The books are written by Russian experts and the research has been done in Russian archives The series has already established itself as required reading for all those interested in the development of armored warfare over the past 100 years The latest title examines in detail the T 34 one of the most famous and successful vehicles in the history of armored warfare The T 34 was a Soviet medium tank produced from 1940 to 1958 It was widely regarded as the world s best tank when the Soviet Union entered the Second World War and although its amour and armament were surpassed by later World War II tanks it is credited as the war s most effective efficient and influential design First produced at the KhPZ factory in Kharkov it was the mainstay of Soviet armored forces throughout World War II and widely exported afterwards At least 39 countries are known to have operated T 34s It was the most produced tank of the war and the second most produced tank of all time after its successor the T 54 55 series The T 34 was still in service with twenty seven countries as late as 1996 There are hundreds of surviving T 34s Examples of the type are in the military collections and museums around the globe and hundreds more serve as war memorials in Russian and former Eastern bloc countries Aimed at the modeler military historian and wargamer we believe that the Russian Armour series provides authoritative information on the classic Soviet tank designs of the 20th century to a level of detail probably not previously available in the English language
