Williams, 2005-09-29 The degree to which markets incorporate information is one of the most important questions facing economists today This book provides a fascinating study of the existence and extent of information efficiency in financial markets with a special focus on betting markets Betting markets are selected for study because they incorporate features highly appropriate to a study of information efficiency in particular the fact that each bet has a well defined end point at which its value becomes certain Using international examples this book reviews and analyses the issue of information efficiency in both financial and betting markets Part I is an extensive survey of the existing literature while Part II presents a range of readings by leading academics Insights gained from the book will interest students of financial economics financial market analysts mathematicians and statisticians and all those with a special interest in finance or gambling **Statistical**

Thinking in Sports Jim Albert, Ruud H. Koning, 2007-07-12 Since the first athletic events found a fan base sports and statistics have always maintained a tight and at times mythical relationship As a way to relay the telling of a game's drama and attest to the prodigious powers of the heroes involved those reporting on the games tallied up the numbers that they believe best described the action and bet *Squares and Sharps, Suckers and Sharks* Joseph Buchdahl, 2016-05-26 People have been gambling in one form or another for as long as history itself Why Money entertainment escape and a desire to win are all traditional explanations Arguably however these are secondary considerations to a higher order purpose a craving for control Gambling offers a means of gaining authority over the unknown granting us a sense of control over uncertainty Almost always that sense is illusory gambling including betting and investing is essentially random yet for many it is nonetheless profoundly rewarding This book attempts to explore the reasons why Along the way it examines The science of

probability and uncertainty Why gambling is often condemned The difference between expectation and utility The irrationality of human beings Evolutionary perspectives on gambling Luck and skill Market efficiency and the wisdom of crowds Why winners take all Cheating Why the process matters more than the outcome **How to Find a Black Cat in a Coal Cellar** Joseph Buchdahl, 2013-01-25 How do we know if we can beat the bookmaker That's easy just look at our bank balance But how do we know if we've not just been lucky More specifically how do we know that someone who says he can do it and who is selling his expertise can keep doing it again and again through talent skill and hard work This book examines the techniques available to answer that question to identify those qualities and to help the punter find value for money in an industry that appears to be largely built on trust and the influence of chance to uncover the truth about sports tipsters and ultimately how to find the best tipsters the Black Cats **Racetrack Betting** Peter Asch, Richard E. Quandt, 1986 A day at the races with its colorful variety and fast paced action appeals to people from all walks of life Not surprisingly the idea of going home with a few more dollars than when one arrived is part of horseracing's charm In this entertaining but substantive volume two distinguished economists who happen to be horseracing buffs outline a tested strategy for placing bets that will increase the reader's chances of a happy outcome at the track The authors are the first to point out that getting rich at the racetrack is unlikely They do maintain however that with attention to their systematic approach the racing fan can achieve the best possible chance at winning In the process the reader learns some of the most important measurement techniques in the social sciences as well as the basic methods of market analysis **Mike Goodman's Your Best Bet** Mike Goodman, Michael J.
