Artificial Historians Marnie Hughes-Warrington,Anne Martin,Lewis Yarlupurka O'Brien,2025-08-08 This book offers readers an introduction to the world of artificial histories and historians It looks behind the interfaces of AI and explores everyday platforms and prize winning history books to identify how people and algorithms make histories and how they might make histories in the future Every moment around the globe histories are made about ordinary people who use digital devices These histories are not made by professional historians or even by humans but by artificial intelligence that scours our digital footprints for patterns AI histories not only shape recommendations about what we might buy or stream but also our access to education healthcare and justice The outcomes of recommendation systems are not just a technology problem or an ethics problem This book argues that this is also a history problem and it needs to be understood as one if we are to make fairer or more just systems It shows us that the deep history of history making including Australian Aboriginal and First Nations histories can help us to navigate the future of history in AI Presenting readers with a range of familiar and accessible examples Artificial Historians is a valuable resource for students scholars and all those interested in global historiography technology and artificial intelligence

Design of Intelligent Applications using Machine Learning and Deep Learning Techniques Ramchandra Sharad Mangrulkar,Antonis Michalas,Narendra Shekokar,Meera Narvekar,Pallavi Vijay Chavan,2021-08-15 Machine learning ML and deep learning DL algorithms are invaluable resources for Industry 4 0

and allied areas and are considered as the future of computing A subfield called neural networks to recognize and understand patterns in data helps a machine carry out tasks in a manner similar to humans The intelligent models developed using ML and DL are effectively designed and are fully investigated bringing in practical applications in many fields such as health care agriculture and security These algorithms can only be successfully applied in the context of data computing and analysis Today ML and DL have created conditions for potential developments in detection and prediction Apart from these domains ML and DL are found useful in analysing the social behaviour of humans With the advancements in the amount and type of data available for use it became necessary to build a means to process the data and that is where deep neural networks prove their importance These networks are capable of handling a large amount of data in such fields as finance and images This book also exploits key applications in Industry 4 0 including Fundamental models issues and challenges in ML and DL Comprehensive analyses and probabilistic approaches for ML and DL Various applications in healthcare predictions such as mental health cancer thyroid disease lifestyle disease and cardiac arrhythmia Industry 4 0 applications such as facial recognition feather classification water stress prediction deforestation control tourism and social networking Security aspects of Industry 4 0 applications suggest remedial actions against possible attacks and prediction of associated risks Information is presented in an accessible way for students researchers and scientists business innovators and entrepreneurs sustainable assessment and management professionals This book equips readers with a knowledge of data analytics ML and DL techniques for applications defined under the umbrella of Industry 4 0 This book offers comprehensive coverage promising ideas and outstanding research contributions supporting further development of ML and DL approaches by applying intelligence in various applications

The Human Use of Human Beings Norbert Wiener, 2025-08-12 For the 75th anniversary a new edition of *The Human Use of Human Beings* the landmark book that delves into the relationship between humans and computers and presciently anticipates many contemporary dilemmas surrounding AI technology With a new introduction by Brian Christian author of the bestselling *Algorithms to Live By* and *The Alignment Problem* In 1950 mathematician philosopher Norbert Wiener ended this classic book on the place of machines in society with a warning We shall never receive the right answers to our questions unless we ask the right questions The hour is very late and the choice of good and evil knocks at our door Wiener the founder of the science of cybernetics the study of the relationship between computers and the human nervous system was widely mislabeled as an advocate for the automation of human life As *The Human Use of Human Beings* reveals his vision was much more complex and interesting and is more relevant in today's world of AI than anyone could have anticipated In his new introduction Brian Christian aptly calls Wiener the progenitor of contemporary AI safety discourse Wiener hoped that machines would release people from relentless and repetitive drudgery to achieve more creative pursuits yet he anticipated the danger of dehumanizing and displacement His pioneering views on the human machine relationship as a communicative process are only more crucial now as we carry in our pockets AI devices

that we can literally speak to His prescient warnings illuminate our contemporary relationships with language art and even social media The Human Use of Human Beings examines the implications of cybernetics for education law language science technology as Wiener anticipates the enormous impact in effect a third industrial revolution that the computer has had on our lives National Car and Locomotive Builder ,1892 **Harper's Young People** ,1892 **The Complete**
