Real Analytic and Algebraic Geometry Fabrizio Broglia, Margherita Galbiati, Alberto Tognoli, 2011-07-11 The series is aimed specifically at publishing peer reviewed reviews and contributions presented at workshops and conferences Each volume is associated with a particular conference symposium or workshop These events cover various topics within pure and applied mathematics and provide up to date coverage of new developments methods and applications *Kernel Functions, Analytic Torsion, and Moduli Spaces* John David Fay, 1992 This memoir is a study of Ray Singer analytic torsion for hermitian vector bundles on a compact Riemann surface *C* The torsion is expressed through the trace of a modified resolvent Thus one can develop perturbation curvature formulae for the Green Szeg kernel and also for the torsion in terms of the Ahlfors Bers complex structure of the Teichmuller space and Mumford complex structure of the moduli space of stable bundles of degree zero on *C* **Real Analytic and Algebraic Geometry** Margherita Galbiati, Alberto Tognoli, 2006-11-14

Encyclopaedia of Mathematics Michiel Hazewinkel, 2012-12-06 This ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathematics It is a translation with updates and editorial comments of the Soviet Mathematical Encyclopaedia published by Soviet Encyclopaedia Publishing House in five volumes in 1977 1985 The annotated translation consists of ten volumes including a special index volume There are three kinds of articles in this ENCYCLOPAEDIA First of all there are survey type articles dealing with the various main directions in mathematics where a rather fine subdivision has been used The main requirement for these articles has been that they should give a reasonably complete up to date account of the current state of affairs in these areas and that they should be maximally accessible On the whole these articles should be understandable to mathematics students in their first specialization years to graduates from other mathematical areas and depending on the specific subject to specialists in other domains of science engineers and teachers of mathematics These articles treat their material at a fairly general level and aim to give an idea of the kind of problems techniques and concepts involved in the area in question They also contain background and motivation rather than precise statements of precise theorems with detailed definitions and technical details on how to carry out proofs and constructions The second kind of article of medium length contains more detailed concrete problems results and techniques

Real Analytic and Algebraic Geometry, 1988 Arc Spaces and Additive Invariants in Real Algebraic and Analytic Geometry Michel Coste, 2007 In this volume the authors present some new trends in real algebraic geometry based on the study of arc spaces and additive invariants of real algebraic sets Generally real algebraic geometry uses methods of its own that usually differ sharply from the more widely known methods of complex algebraic geometry This feature is particularly apparent when studying the basic topological and geometric properties of real algebraic sets the rich algebraic structures are usually hidden and cannot be recovered from the topology The use of arc spaces and additive invariants partially obviates this disadvantage Moreover these methods are often parallel to the basic approaches of complex algebraic geometry The

authors presentation contains the construction of local topological invariants of real algebraic sets by means of algebraically constructible functions This technique is extended to the wider family of arc symmetric semialgebraic sets Moreover the latter family defines a natural topology that fills a gap between the Zariski topology and the euclidean topology In real equisingularity theory Kuo s blow analytic equivalence of real analytic function germs provides an equivalence relation that corresponds to topological equivalence in the complex analytic set up Among other applications arc symmetric geometry via the motivic integration approach gives new invariants of this equivalence allowing some initial classification results The volume contains two courses and two survey articles that are designed for a wide audience in particular students and young researchers

Multidimensional Complex Analysis and Partial Differential Equations Francois Treves,Paulo D. Cordaro,Howard Jacobowitz,1997 This collection of papers by outstanding contributors in analysis partial differential equations and several complex variables is dedicated to Professor Treves in honour of his 65th birthday There are five excellent survey articles covering analytic singularities holomorphically nondegenerate algebraic hypersurfaces analyticity of CR mappings removable singularities of vector fields and local solvability for systems of vector fields The other papers are original research contributions on topics such as Klein Gordon and Dirac equations Toeplitz operators elliptic structures complexification of Lie groups and pseudo differential operators

Ordered Algebraic Structures and Related Topics Fabrizio Brogna,2017 Contains the proceedings of the international conference Ordered Algebraic Structures and Related Topics held in October 2015 at CIRM Luminy Marseilles Papers cover topics in real analytic geometry real algebra and real algebraic geometry including complexity issues model theory of various algebraic and differential structures Witt equivalence
