Political Globalization:

Political Globalization Morten Ougaard, 2003-11-25 Morten Ougaard provides a new and distinct theoretical perspective to the analysis of the globalization of politics. The book analyzes global governance as the partial and uneven globalization of different aspects of statehood. It focuses on the institutional infrastructure highlighting the role of the G7 OECD nexus in providing strategic leadership, discusses an emerging global function of societal persistence or public goods governance and relations of power between social forces and finally it discusses American hegemonic leadership in the light of the dual power persistence perspective.

The Oxford Companion to Politics of the World Joel Krieger, 2001-08-02 The world has seen dramatic changes since the publication of the first edition of *The Oxford Companion to Politics of the World* in 1993. In the post Cold War world globalization now offers wealth and opportunities on a broader scale as well as greater international harmony but threatens to reinforce the advantage gap between wealthy and poor regions and intensify environmental degradation. Conflict and squalor expressed in brutal brushfire wars, epidemics and chronic underdevelopment vie with equally dramatic accounts of growth and democracy associated with a liberal political order and the global diffusion of trade, investment and communications. Drawing on the breadth of the first edition, this updated edition reflects the changing world with a reassessment of many of the core themes of the Companion and new articles on the people, concepts and events that have shaped the world since 1993. The second edition includes biographies of Kofi Annan, Tony Blair, Bill Clinton and Gerhard Schröder, articles on events such as the Rwandan Genocide and the war in Kosovo and coverage of international trade developments such as NAFTA and the World Trade Organization. Eighty-seven of the 672 articles in the Second Edition are completely new; most others are thoroughly revised. This edition also features a substantial new set of articles: a dozen essays on critical issues written by influential figures. Recognizing the importance of including varying viewpoints, the editors have commissioned these essays to provide an informed and often passionate debate on controversial topics. Discussions include Lani Guinier and Glenn Loury on Affirmative Action, Francis Fukuyama and Milton Fisk on the Limits of Liberal Democracy, and Lloyd Axworthy and John Bolton on the United Nations. The contributors discuss nearly every nation in the world, including extensive information on institutions, political parties, leaders and the sources of political mobilization and conflict. The volume also includes biographies of more than seventy-five political leaders and thinkers who have shaped the contemporary political world. Articles include detailed discussions of critical historical developments and events, concepts, international law and organizations. *The Oxford Companion to Politics of the World* Second Edition is an accessible, timely, thought-provoking and comprehensive reference that captures the complexity and vitality of contemporary world affairs.

The Return of the State Adam Harmes, 2009-12-01 In this provocative book Adam Harmes reveals how only effective political globalization can balance and hold in check the extremes of global corporations Free trade agreements and economic globalization have created a gap between global transnational corporations and governments mired within national boundaries Large corporations are now operating above the law Return of the State takes us into the corporate boardrooms government departments and international organizations where a new global compromise is being forged It argues that political globalization is both necessary and likely revealing what it will involve and what it will mean for corporations civil society and private citizens around the world Return of the State is well researched hard hitting controversial and prescient

Lawyers and the Rise of Western Political Liberalism Terence Charles Halliday, Lucien Karpik, 1997 In contrast to other theories of legal professions which neglect politics this volume advances a political theory of lawyers collective action by demonstrating lawyers influence on the emergence and development of western political liberalism Four sociologists and four historians show how lawyers over several centuries have been variously committed to the building of liberal political society in France Germany Great Britain and the United States The introductory chapters written by the editors present a theoretical argument that integrates the historical and comparative studies of lawyers engagement in three areas of liberal politics the constitution of the moderate state the institutions of civil society and the constitution of individual rights The editors conclude the book with an essay on lawyers historical involvements in political globalization This fresh interpretation not only demonstrates the variety of relationships between lawyers and politics but it delineates issues concepts and a theory that helps understand the current action of lawyers in new democracies

[Public Support and Illiberal Behavior of Right-wing Populist Governments during the Covid-19 Pandemic](#) Tabea Geißler, 2022-03-23 Master s Thesis from the year 2021 in the subject Politics Other International Politics Topics grade 1 0 University of Tübingen

Wirtschafts und Sozialwissenschaftliche Fakultät language English abstract

Against the backdrop of autocratic opportunism and illiberal behavior during Covid 19 there is a large debate in the field of populism and democracy research about whether populist parties and leaders are strengthened or weakened by the Covid 19 crisis. However, due to the newness of the current crisis, the justification for one side or the other is based more on theoretical assumptions than on reliable empirical research, while the existing empirical studies refer exclusively to the first wave of the pandemic. These examinations often imply that populists tend to benefit from the crisis since their approval rates either slightly increased during the first wave or remained on the same level. However, as the second and third waves unfold in autumn 2020 and winter/spring 2021, a new picture emerges. Right-wing populist governments in Europe, on average, appear to be losing public support, although this is not the case in non-populist governed EU member states. This phenomenon seems puzzling since it would be more likely to expect that populist governments would gain public support through the crisis. This conclusion not only derives from the hour of the executive but also to the observation that societies in times of crisis attribute a stronger leadership role to their government and express more allegiance than in ordinary times, a finding also known as the rally round the flag effect. This would help right-wing populists to present themselves as strong and decisive crisis leaders, which could strengthen their power and popularity as authoritarian leaders. Against this background, the argument is made that the illiberal behavior of right-wing populists, such as authoritarian leadership, corruption, and discriminatory measures, which is assumed constitutive of their behavior, leads to a decline in public support under the conditions of acute threat. Since the relationship between illiberal behavior by right-wing populist governments during Covid 19 and public support has not been systematically investigated yet, this thesis aims to take a first step in this direction by taking a more nuanced view to gain new empirical knowledge regarding why, when, and how a loss of public support for right-wing populist governments can be observed during the first, second, and third wave of the pandemic. The results support the hypothesis, while alternative explanations such as containment measures or the economic situation tend to be less relevant.

The Political Economy of Globalization

Satya Dev Gupta, 1997-04-30

Globalization is transforming the world at an accelerated pace. Integration of the world continues widening and intensifying international linkages in economic, political, and social relations. Liberalization of trade and finance, lubricated by revolutionary changes in information technology, has resulted in significant economic growth at the global level. On the other hand, the process of globalization is changing the nature of production relations, threatening the traditional roles of the nation state and carrying with it far-reaching implications for sustainable growth, development, and the environment. Although both developed and developing countries are actively participating in this saga of globalization, nearly ninety countries, as the United Nations Human Development Report 1996 indicates, are worse off economically than they were ten years ago, leading to global polarization between haves and have-nots. The report further indicates that the gap between the per capita incomes of the industrialized world and the developing countries, far from narrowing, has more than tripled.

during the last thirty years Further a majority of the countries benefitting from this globalization drive have seen a rise in inequality and poverty This failure of market driven globalization to reward the benefits equitably led the United Nations to proclaim 1996 as the International Year for the Eradication of Poverty IYEP and the decade of 1997 2006 as the international decade for the eradication of poverty and to promote people centered sustainable development The Globalization of Politics Evan Luard,2016-07-27 The book examines the kind of action that needs to be taken by world bodies in fields such as the trafficking of drugs international terrorism world hunger and other pressing problems and the type of political activity through which individuals can seek to influence them Globalization, Development and The State Jørgen Dige Pedersen,2008-08 This book presents the story of how India and Brazil have managed the challenges of economic globalization since 1990 Using an innovative combination of theories of developmental states with theories on the changing nature of global capitalism the analysis presented here explains how India and Brazil have successfully managed those challenges that the opening of their economies has introduced and their different degrees of success The key to their economic performance lies in the establishment of new and more intensive forms of business state collaboration which ensures that policy initiatives have progressively been adapted to the interests and capabilities of the domestic business class The analysis points to a new theoretical perspective on developmental states In an increasingly knowledge intensive global economy developmental states acquire new forms that are more collaborative and democratic in contrast to earlier authoritarian states They also need strong inputs of an intellectual nature making authoritarian solutions less likely to succeed Book cover *CSA Political Science & Government* ,2005 The Global Economy Lee Edwards,2001 In a world that is changing faster and more dramatically than at any time in history the family still remains the fundamental social unit of every country How is it faring economically socially spiritually In the context of China s one child policy the AIDS epidemic in Africa and the widening disparity between the haves and have nots this volume examines the focus of globalization on politics and society and what can be done to preserve and strengthen the family in a world increasingly indifferent to the age old virtues of faith hope and charity *Globalization and Domestic Politics* Jack Vowles,Georgios Xezonakis,2016-01-07 Globalisation and Domestic Politics addresses how a widely acknowledged and pervasive economic and social process and globalization affect democratic politics among both masses and elites It inquires into the extent to which and how globalization affects the political attitudes and behaviour of ordinary citizens and the policies of political parties Chapters discuss to what extent globalization affects the salience of left right politics the content of party programmes and promises leadership evaluations economic voting electoral accountability the influence of religion in politics electoral turnout political efficacy satisfaction with democracy and the quality of democracy It primarily draws on data from the Comparative Study of Electoral Systems CSES made up of three modules of election surveys from 44 countries and 107 elections The Comparative Study of Electoral Systems CSES is a collaborative program of research among election study teams from around the world

Participating countries include a common module of survey questions in their post election studies The resulting data are deposited along with voting demographic district and macro variables The studies are then merged into a single free public dataset for use in comparative study and cross level analysis The set of volumes in this series is based on these CSES modules and the volumes address the key theoretical issues and empirical debates in the study of elections and representative democracy Some of the volumes will be organized around the theoretical issues raised by a particular module while others will be thematic in their focus Taken together these volumes will provide a rigorous and ongoing contribution to understanding the expansion and consolidation of democracy in the twenty first century Series editors Hans Dieter Klingemann and Ian McAllister
