The Generative Study of Second Language Acquisition Suzanne Flynn,Gita Martohardjono,Wayne O'Neil,2014-01-14 The vast majority of work in theoretical linguistics from a generative perspective is based on first language acquisition and performance The vast majority of work on second language acquisition is carried out by scholars and educators working within approaches other than that of generative linguistics In this volume this gap is bridged as leading generative linguists apply their intellectual and disciplinary skills to issues in second language acquisition The results will be of interest to all those who study second language acquisition regardless of their theoretical perspective and all generative linguists regardless of the topics on which they work **Festschrift f r Professor Waldemar Pfeiffer zum 60. Universal Grammar and Parameter Resetting in Second Language Acquisition Martin Kaltenbacher, 2001 Diese Arbeit wurde mit dem Förderpreis der Landeshauptstadt Salzburg zur Förderung von Kunst Wissenschaft und Literatur ausgezeichnet The book addresses the issue of Universal Grammar UG and parameter resetting in Second Language L2 acquisition The central questions are what is the initial state of a learner's L2 grammar and does UG play a role in L2 acquisition Several hypotheses are evaluated and set in relation to four parameters that are suggested to play a central role in UG and language acquisition Particular focus is put on parametric differences between English and German For this purpose Austrian learners have been tested on null subjects and adverbial and verb placement It is shown that the learners transfer the L1 parameter settings into their early English interlanguage grammars They are then involved in a disrupted process of parameter resetting which is not guided by UG but proceeds via cognitive processes and learning strategies Contents Universal grammar in language acquisition The pro drop parameter Parameterisation of adverbial and adverb placement The head parameter A case study with Austrian learners of L2 English

Al-Banyan, 1996 *The Acquisition of French in Different Contexts* Philippe Prévost, Johanne Paradis, 2004-02-26 This volume is a collection of studies by some of the foremost researchers of French acquisition in the generative framework It provides a unique perspective on cross learner comparative research in that each chapter examines the development of one component of the grammar functional categories across different contexts in French learners i e first language acquisition second language acquisition bilingual first language acquisition and specifically language impaired acquisition This permits readers to see how similar issues and morphosyntactic properties can be investigated in a range of various acquisition situations and in turn how each context can contribute to our general understanding of how these morphosyntactic properties are acquired in all learners of the same language This state of the art collection is enhanced by an introductory chapter that provides background on current formal generative theory as well as a summary and synthesis of the major trends emerging from the individual studies regarding the acquisition of different functional categories across different learner contexts in French
