Kerlin,2005-06-28 The fall of Communist regimes in Eastern Europe raised the complex question of how social services were to be distributed and administered in countries with legacies of highly centralized state In Poland a series of reforms attempted to modify and decentralize social service programs Yet with Poland s second round of decentralization long held and clearly specified reform goals were undermined from the very outset In this insightful detailed and carefully argued study Janelle A Kerlin demonstrates how and why reforms intended to improve services and increase citizen participation in social service programming largely failed to meet expected goals The politics of reform development including political deals exclusionary tactics and hidden maneuvering by Polish policymakers prevented any significant upgrade of services or real change in decision making structures Conflicting ideologies and pressures on policy actors stemming from historical institutional political and international sources often resulted in compromises that led to unfavorable public service outcomes In this book Kerlin uses focused interviews with leading reform actors and a nationwide representative survey of two hundred public social service institutions to develop a model that connects the politics of the decentralization process with social service outcomes Not only students of the former Soviet bloc but also those interested in the links between politics and policy outcomes more broadly will find in this volume an informative and instructive case study that has far reaching implications Poland ,1992 **Fiscal Decentralization Reforms** Michal Plaček,František Ochrana,Milan Jan Půček,Juraj Nemec,2020-05-05 This book examines the impacts of fiscal decentralization reforms on the efficiency of local governments in Central and Eastern European CEE countries By offering a comparative perspective and by applying econometric methods and regression models it analyses various reform trajectories and their effects on individual CEE countries Furthermore the book discusses input and output indicators for evaluating the efficiency of municipalities Readers will learn about the common features of these countries the impact of path dependence and future prospects for decentralization reforms In closing the book discusses modern management and administration methods

Local Government Reform as State Building Anthony Levitas, 2014 Since 1989 Poland has become one of the most decentralized states in Europe Local government now control a third of all public expenditures They have also delivered the goods modernizing the country's infrastructure and restructuring its schools This success cannot be attributed to widespread civic engagement because decentralization in Poland was clearly a revolution from above Nor can it be attributed to the implementation of rules typically thought to enhance accountability in decentralized polities because the Polish local governments do not finance themselves and many of their responsibilities remain poorly defined Instead I argue that this success is due to the creation of meso level institutions which integrated local governments into the regulatory structure of the state Their design and operation suggests that the promise of decentralized governance lies less in getting the rules right than in constructing institutions that encourage their renegotiation and adjustment

From Solidarity to Geopolitics Tsveta Petrova, 2014-09-22 This book theorizes a mechanism underlying regime change waves the deliberate efforts of diffusion entrepreneurs to spread a particular regime and regime change model across state borders Why do only certain states and non state actors emerge as such entrepreneurs Why how and how effectively do they support regime change abroad To answer these questions the book studies the entrepreneurs behind the third wave of democratization with a focus on the new eastern European democracies members of the European Union The study finds that it is not the strongest democracies nor the democracies trying to ensure their survival in a neighborhood of non democracies that become the most active diffusion entrepreneurs It is instead the countries where the organizers of the domestic democratic transitions build strong solidarity movements supporting the spread of democracy abroad that do The book also draws parallels between their activism abroad and their experiences with democratization and democracy assistance at home
