Policy Evaluation Ilcpp:

Policy Evaluation Ray C. Rist, 1995 For governments to be successful in achieving their objectives they need to select the correct policy instruments This volume addresses the role of policy instruments in achieving policy objectives Policy Evaluation provides a systematic assessment of the impact that public policy evaluations have on the governance of democratic societies This book emphasises the impacts of policy evaluations on the formulation implementation and accountability functions of governments At all three phases of the policy cycle there is a need for coherent and systematic evaluation This book demonstrates how such evaluations can be conducted and the opportunities for their subsequent utilization Handbook of Public Policy Evaluation Stuart S. Nagel, 2001-12-13 Handbook of Public Policy Evaluation is the only book of its kind to present aspects of public policy evaluation that relate to economic technology social political international and legal problems Rather than looking at specific narrowly focused programs this book emphasizes broad based evaluation theory study and application providing a rich variety of exceptional insights and ideas Designed to facilitate integration and coherence key features in this volume include Systematic evaluation measuring the policy alternatives available for achieving goals Win win evaluation processing policy alternatives that can enable conservatives liberals and other major viewpoints to all come out ahead of their best initial expectations simultaneously Policy evaluation offering methods examples studies professionalism perspectives concepts trends substance theory applications dispute resolution interdisciplinary interaction and bibliographies and applications The book targets the need for improvement in the methods processes and substance of public policy and opens the gate of public policy to be more effective efficient and equitable Policymakers administrators analysts and practitioners alike will find the Handbook a necessary resource of alternative public policies that are placed in context with a direct course to positive results **Public Policy and Program Evaluation** Evert Vedung, 2017-07-12 Evaluation is a controversial and little understood strategy of public governance control and decision making As early as classical antiquity scholars were summoned to court to counsel kings Public policy and program evaluation is a recent addition to the great chain of attempts to use the brainpower of scholars and scientists to further the interests of the state Evaluation scholars are asked to provide retrospective assessments of the implementation output and outcome of government measures in order to effect deeper understanding and well grounded decisions on the part of those in charge of government operations Evaluation is the process of distinguishing the worthwhile from the worthless the precious from the useless evaluation implies looking backward in order to be able to steer forward better Written from a political science perspective Public Policy and Program Evaluation provides an overview of the possibilities and limits of public sector evaluation Evert Vedung examines evaluation as a mechanism for monitoring systematizing and grading government activities and their results so that public officials in their future oriented work will be able to act as responsibly creatively and efficiently as possible Topics discussed include Evaluation Rationality and Theories of Public Management Models of

Evaluation Internal or External Evaluation Impact Assessment as Tryout and Social Experimentation Process Evaluation and Implementation Theory The Eight Problems Approach to Evaluation and Uses and Users of Evaluation All evaluation rests upon the idea that perceptions opinions intentions judgments in short everything concerned with the world of human consciousness play such interesting roles in political and administrative action that their functions are worth investigating Through experience humans may learn from past actions The interventions of the modern state are so extensive their execu

Handbook of Public Policy Evaluation Frédéric Varone, Steve Jacob, Pirmin Bundi, 2023-10-06 This comprehensive Handbook examines public policy evaluation in democracies Focusing on the political dimension of the evaluation process it argues that policy evaluation can be an emancipatory tool reducing social inequalities and exclusion and offers novel suggestions on how evaluations can be used to improve democratic policymaking *Handbook of Public Policy Evaluation in the Global South* Anis Ben Brik, 2025-06-09 This insightful Handbook delves into public policy evaluation in the Global South Drawing on in depth case studies it analyzes the complex interplay of historical political economic and social factors that shape evaluation practices in Africa Asia Latin America and the Middle East *Evaluating Public Policy* Frank Fischer, 1995 Millions of dollars are spent each year on the evaluation of domestic and foreign policies Policy analysis has emerged as an important component of the policy making process in American government This text differs from others not only does it teach students how to evaluate the empirical aspects of a public policy but also provides an analytical framework for assessing the value judgements that infuse policy decisions Students learn to assess whether a program reflects the kinds of things that society ought to be doing **Public Policy Evaluation** David Nachmias, 1979 *Mind the Gap* Jos Vaessen, Frans L. Leeuw, 2011-12-31 Over the past twenty to thirty years evaluation has become increasingly important to the field of public policy The number of people involved and specializing in evaluation has also increased markedly Evidence of this trend can be found in the International Atlas of Evaluation the establishment of new journals and evaluation societies and the increase in systems of evaluation Increasingly the main reference point has become an assessment of the merit and value of interventions as such rather than the evaluator's disciplinary background This growing importance of evaluation as an activity has also led to an increasing demand for the type of competencies evaluators should have Evaluation began as a niche area within the social and behavioral sciences It subsequently became linked to policy research and analysis and has more recently become trans disciplinary This volume demonstrates an association between the evaluation tradition in a particular country or policy field and the nature of the relationship between social and behavioral science research and evaluative practice This book seeks to offer comprehensive data which lead to conclusions about patterns that transcend the gap between evaluation and the social scientific disciplines *Mind the Gap* has a twofold aim The first is to highlight and characterize the gap between evaluation practices and debates and the substantive knowledge debates within the social and behavioral sciences The second is to show why this gap is problematic for the practice of evaluation while at the same time

illustrating possible ways to build bridges The book is centered on the value of producing useful evaluations grounded in social science theory and research

Advancing Public Policy Evaluation John Mayne, 1992 Several research topics are discussed in this volume beginning with research related to the organization and management of program evaluation within government departments or across government departments in a national or sub national jurisdiction Following this there are papers on research related to the planning of evaluation schedules and or the planning of individual evaluations research related to the conduct management methods and reporting of program evaluation studies within and across national jurisdictions and research related to enhancing the utilization of evaluation findings The volume focuses on how these aspects of the evaluation process relate and are useful to the various clients for evaluation These clients include those within the evaluating organization program managers heads of organizations political clients legislative bodies politicians clients in central control organizations budget offices audit offices and the public

Public Policy Evaluation Stuart S. Nagel, 2018-08-13 First published in 1998 this volume examines how super optimum decisions involve finding alternatives to controversies whereby Conservatives Liberals or other major groups can all come out ahead of their best initial expectations simultaneously This book is organised in terms of concepts methods causes process substance and the policy studies profession Concepts clarify that policy evaluation traditionally involves 1 Goals to be achieved 2 Alternatives available for achieving them 3 Relations between goals and alternatives 4 Drawing a conclusion as to the best alternative in light of the goals alternatives and relations and 5 Analysing how the conclusion would change if there were changes in the goals alternatives or relations Super optimizing also involves five related steps but with the following improvements 1 Goals are designed as conservative liberal or neutral 2 Alternatives get the same designations 3 Relations are simplified to indicate which alternatives are relatively high or low on each goal 4 The conclusion involves arriving at an alternative that does better on Goal A than Alternative A and simultaneously better on Goal B than Alternative B and 5 The fifth step involves analysing the super optimum or win win alternative in terms of its feasibility as to the economic technological psychological political administrative and legal matters

Politics and Practices of Inter-Governmental Evaluation Olaf Rieper, Jacques Toulemonde, 1997-01-01 To understand local responsibilities and requirements one must also understand the role that regional and national governmental agencies and administrations play Politics and Practices of Intergovernmental Evaluation is a landmark work in the area of the evaluation of intergovernmental policies programs and projects Comparative and cross national in its perspective the material presented here not only provides a systematic theoretical and empirical treatment of intergovernmental evaluation but does so with case material from seven nations and the European Union No other such comparative work exists on this topic Politics and Practices of Intergovernmental Evaluation will be of interest to political theorists policy makers and scholars and students of government and the evaluation community
