### **Impact of Political Stability on Economic Development** Addis Ababa Othow Akongdit,2019-10-04

The main theme of this study is chosen in response to the general consensus on the importance of conducting a comprehensive study that may shape the economic policies and promote the business sector as well as the government and other organizations. However, the key question posed by this study is whether the theory that political stability fosters economic development is simply the wishful thinking of people who value both stability and growth or whether it is a delusion of those who believe that most developing countries may enjoy rapid growth if they are stable. The importance of this study is clear. South Sudan is confronted with enormous challenges of administrative, ethnic, political, and economic development. In light of this, the current study addresses the following issues: What is the impact of the political system in South Sudan on economic development? What is the impact of oil resources on sustainable development? What is the impact of the oil shutdown on political and economic stability, and what is the possibility of deficit financing? Is there any possibility for cooperation between Sudan and South Sudan? In this context, the major objective of this study is to analyze the political development of the country to verify that political stability fosters the achievement of economic and social development. It also seeks to analyse the political history of Sudan in general and South Sudan in particular, emphasising the importance of political stability among other considerations as a precondition for socioeconomic development. Furthermore, other objectives of the study include suggestions on how political stability could be ensured in South Sudan and how good governance may promote political and economic stability. In light of the above, this study focuses on the issues of the political transition and policies that will improve the economic, political, and social well-being of the people of South Sudan. It seeks ways of setting up policies that will raise the standard of living of people with sustained growth and move from a simple low-income economy to a modern high-income economy. It also attempts to develop a framework for cooperation between Sudan and South Sudan. The methodology that is adopted to address these issues is collecting, sorting, and analysing primary and secondary information relating to the history of political and economic development in South Sudan using empirical approaches such as SWOT analysis, information sources, references, and books. However, this study is organized as follows: chapter 1 discusses political stability and economic development in a theoretical framework through which we explore the empirical analysis; it is divided into four sections. Section 1 focuses on definition, causes, and measurement of political stability with an aim to assess the effect of political stability on growth-related variables. In section 2, we define the concept of political instability and measure it by using indicators like the number of coups, the number of major government crises, the number of cabinet changes, and the number of political revolutions as well as political assassinations. Section 3 discusses the concept and definition of economic development and summarizes the major theories of economic development in five fundamental elements. The last section explores the implications of financing economic development by discussing domestic resources including deficit financing and foreign financial resources and the role of each of them in achieving economic development. Chapter 2 presents the political and social background of South Sudan, is divided into three sections. Section 1 discusses

South Sudan's ability to function and successfully implement its policies and strategic vision for the year 2040. Section 2 focuses on the demographic structure of South Sudan in terms of population, education, languages and culture. Section 3 discusses the social indicators such as infrastructure, poverty and corruption which affect improving social welfare as well as the political stability and economic development of the Republic of South Sudan. Chapter 3 focuses on the South Sudan economy and the challenges. Here we discuss the political and development challenges facing South Sudan as well as the investment opportunities. This chapter discusses the major challenges which face South Sudan especially issues such as border demarcation, political reform and oil shutdown as well as investment opportunities in oil and agriculture. In chapter 4 we discuss South Sudan's oil and economic development. It focuses on oil resources and their impact on sustainable development, the impact of oil shutdown on political and economic development and the possibility of deficit financing. In chapter 5 we discuss the future of stability and prosperity in South Sudan. It discusses how good governance and cooperation can be enormously beneficial to South Sudan in the process of building sustainable political and economic stability and what South Sudan can learn from other countries. The major findings of this study are as follows: Political stability plays an important role in determining economic growth and economic development in many economies. The degree of political stability is high if there is a high degree of democracy or autocracy. Strong democracies or strong autocracies are best equipped to provide political stability that may lead to economic development. It is then the level of political stability within a given country regardless of regime type that results in economic growth. Long term sustainable economic growth depends on the ability to raise the rates of accumulation of physical and human capital by securing necessary sources: domestic, foreign or deficit finance to use efficiently for financing economic development. Most economists view corruption as a major obstacle to development. It is seen as one of the causes of low income and is believed to play a critical role in generating poverty traps (e.g. Blackburn et al 2006). Thus corruption according to this view sands the wheels of development and it makes economic and political transitions difficult. Not only is good governance critical to development but it is also the most important factor in determining whether a country has the capacity to use resources effectively to promote economic growth and reduce poverty.

**The Effect of Political Stability and Governance on Economic Development** Rüçhan Kamil Altun, 2017

This paper studies the effect of political stability and governance on economic development by consulting the literature, examining the data and through empirical estimations. Additionally, further attention is paid to the role of political leadership and democratic institutions. The empirical estimations involve a panel dataset containing 157 countries including 35 developed and 122 developing countries covering a 10 year period between 2002-2011. The results confirm the statistically and economically significant effect of political stability on economic development in the short and long run. All else equal, a one point increase in the political stability variable is associated with an increase of the GDP growth rate by around 1.38-1.62.

percentage points or an increase of GDP per worker by around 1 207 1 730 These results are robust to alternative model specifications and political stability indicators as well as after controlling for autocorrelation and heteroskedasticity Using a cross sectional IV analysis these results are addressed for potential endogeneity caused by simultaneity bidirectionality although this point requires more attention and the use of strong time variant instrumental variables Regarding governance the effect of the control of corruption government efficiency and regulatory quality are significant and robust while contrary to expectations the rule of law and voice and accountability give insignificant results Untimely and unanticipated executive changes have an additional significant detrimental effect on growth rates while elections have no significant effect regardless of the political system and level of development Political Stability and Development Dirk Berg-Schlosser,Rainer Siegler,2023 Drawing on fieldwork in Kenya Tanzania and Uganda and on their comprehensive statistical analyses the authors investigate in a systematic comparative manner the factors that have contributed to the emergence of each of the three systems and assess its respective performance with regard to a wide range of social and economic indicators

Political Stability and Economic Growth Winberg Chai,Carolyn Chai,Cal Clark,1994 The Effect of Food and Energy Security on Political Stability Mohamed Taher Sassi,2020-07-27 Master s Thesis from the year 2020 in the subject Business economics Economic Policy grade 10 University of Marburg Faculty of Business Administration and Economics Economics Institutions language English abstract Since both food security and energy security are countries strategic objective this study typically advocates a deep understanding of the concept of political stability to incorporate food and energy security as a new pillar of conflict management based on an empirical understanding of the nexus and its effect We used food deficit as proxy for food security and energy imports for energy security from the World Bank database Using the panel fixed effect method on data for more than 150 countries from 2008 to 2016 we identified a highly significant positive effect of economic growth tourism and high institutional quality on stability Destabilizing factors were also detected such as corruption and arable land scarcity The negative effect of food insecurity was illustrated after the introduction of the squared term of food deficit Energy imports also have a destabilizing effect These results for the effect of food and energy security effect holds robust to various control of other determinants in our regression This study calls for more attention to the energy and food strategy within a country Keeping peace and stability in the world will require development effort and technological exchange between countries in terms of food strategy and renewable energy plans These measures will boost economic growth and improve the quality of institutions which will help fighting corruption **Economic Growth with Political Stability** Phillip M. Chen,1988 **Political Credibility and Economic Development** Silvio Borner,Aymo Brunetti,Beatrice Weder,2016-07-27 Why have the economies of some developing countries fallen back while others have advanced Why have so many stabilization and structural adjustment programs failed to deliver growth dividends This book shows that there is a common and valid answer political credibility defined as the predictability of the institutional rules of

the game This case is not only argued theoretically but also found to be confirmed by empirical analysis Ten case studies pitting Latin American countries against Southeast Asian ones reveal the sources of political credibility Economic openness is the necessary precondition long term reputation or democratic participation the sufficient one Despite the seemingly superior strength of authoritarian reputation democratic control is the more successful road Patterns of Political Instability David Sanders,1981

**Political Fragility: Coups D'État and Their Drivers** Aliona Cebotari, Enrique Chueca-Montuenga, Yoro Diallo, Yunsheng Ma, Ms. Rima A Turk, Weining Xin, Harold Zavarce, 2024-02-16 The paper explores the drivers of political fragility by focusing on coups d'état as symptomatic of such fragility It uses event studies to identify factors that exhibit significantly different dynamics in the runup to coups and machine learning to identify these stressors and more structural determinants of fragility as well as their nonlinear interactions that create an environment propitious to coups The paper finds that the destabilization of a country's economic political or security environment such as low growth high inflation weak external positions political instability and conflict set the stage for a higher likelihood of coups with overlapping stressors amplifying each other These stressors are more likely to lead to breakdowns in political systems when demographic pressures and underlying structural weaknesses especially poverty exclusion and weak governance are present or when policies are weaker through complex interactions Conversely strengthened fundamentals and macropolicies have higher returns in structurally fragile environments in terms of staving off political breakdowns suggesting that continued engagement by multilateral institutions and donors in fragile situations is likely to yield particularly high dividends The model performs well in predicting coups out of sample having predicted a high probability of most 2020-23 coups including in the Sahel region

**Political Stability and Economic Development : Case of South Sudan** Addis Ababa Othow Akongdit, Issam A.W. Mohamed, 2013 Political stability and economic development are deeply interconnected On the one hand the uncertainty associated with an unstable political environment may reduce investment and the speed of economic development On the other hand poor economic performance may lead to government collapse and political unrest The question is Why most of developing countries are unable to enjoy rapid growth A politically unstable environment usually means that the government is misusing or mismanaging the country's resources resources are not being used to their full capacity or in a manner whereby economic development could be maximized In a situation where civil war is occurring money and human resources can be taken away from normal jobs and processes which could have been used to develop the economy It is also right that if a country's political environment is volatile this will deter investors foreign trade and economic development Those problems are embodied in the new state of South Sudan along with the dependence on one economic resource oil production How to finance development can be an impediment in the process of building a nation

**Democracy, Political Stability, and Economic Growth in Developing Countries**, 1986 The Effects of Diversity on Economic and Political Stability Christian Brandes, 2018-07-23 Master s Thesis from the year 2017 in the subject Economics Other grade 1 7 <http://www.uni-jena.de/language/English/abstract> Many developing countries do not only suffer from weak institutions poor economic performance and corruption but also from separatist movements and violent civil conflicts The question arises why some countries could achieve economic growth and development while others never experienced considerable economic development and are trapped in a vicious circle of re occurring violent conflicts and economic deterioration Since developing countries tend to be more diverse in terms of ethnicity language and religion and many civil conflicts appear to have an ethnic or religious component diversity is regarded as a main cause of economic and political instability Furthermore many scholars consider higher levels of diversity in the least developed countries to be the crucial factor that leads to inefficient policy decisions and impedes growth and development This master thesis addresses the question how diversity affects economic and political stability and elaborates appropriate parameters which are further used in a composite indicator CI to quantify a country s stability respectively instability The thesis is structured as follows After a review of the literature on the relations between diversity and economic development and civil conflicts in chapter two the historic and environmental conditions under which different ethnic and linguistic groups emerged are described Further the effects of external shocks which shaped ethnic development in the special case of Africa are assessed Chapter four introduces the most common measurements of ethnic linguistic and religious diversity and describes the differences between fractionalisation and polarisation Several studies describing the effects of different aspects of diversity on various economic and political outcomes are discussed This is followed by chapter five which is addressing the causes of instability and civil conflict It is examined how conflict as the major outcome of instability is related to and can be driven by diversity and which roles economic and institutional aspects play in explaining civil conflicts In the subsequent part several indicators which capture different aspects of stability are critically assessed Further parameters and their respective weights towards a new composite indicator of instability are elaborated Subsequently chapter seven concludes

**Politics, Institutions, and the Economic Performance of Nations** Clemens L. J. Siermann, 1998 Why do some countries have faster rates of economic growth than others The relationship between economic growth and the political structure of a country has long been explored in an attempt to understand why

some countries experience faster rates of growth than others This book explores these issues from a new in depth perspective challenging conventional theory which claims that democracy promotes economic growth In examining the economic consequence of politics and institutions the author provides an extensive critical review of 47 empirical studies This previous research on the relationship between political and institutional systems and economic policy and growth is analysed and its conclusions questioned Clemens Siemann then creates a new up to date data set on the causality between political and institutional factors and economic variables In examining the relationship between economic growth institutional systems and political stability the author assesses their impact on inflation fiscal policy central bank independence budget deficits public debt and the investment income ratio In conclusion he argues that political stability rather than the type of political system is a key factor in explaining the differences in the rates of economic growth between countries This insightful new book will be of interest to economists political scientists researchers and post graduates working in the fields of political economy growth theory and economic development      *Quest for Political Stability in India* D.
