We reuse these data in all the subsequent chapters which we keep as self-contained as possible. The empirical applications range from key concepts of empirical asset pricing beta estimation portfolio sorts performance analysis Fama French factors to modeling and machine learning applications fixed effects estimation clustering standard errors difference in difference estimators ridge regression Lasso Elastic net random forests neural networks and portfolio optimization techniques. Key Features. Each chapter is reproducible in the sense that the reader can replicate every single figure table or number by simply copying and pasting the code we provide. A full-fledged introduction to machine learning with scikit-learn based on tidy principles to show how factor selection and option pricing can benefit from Machine Learning methods.
