**Driverless Cars, Urban Parking and Land Use** Robert A. Simons, 2020-02-05 The subject of driverless and even ownerless cars has the potential to be the most disruptive technology for real estate land use and parking since the invention of the

elevator This book includes new research and economic analysis plus a thorough review of the current literature to pose and attempt to answer a number of important questions about the effect that driverless vehicles may have on land use in the United States especially on parking Simons outlines the history of disruptive technologies in transport and real estate before examining how the predicted changes brought in by the adoption of driverless technologies and decline in car ownership will affect our urban areas What could we do with all the parking areas in our cities and our homes and institutional buildings that may no longer be required Can they be sustainably repurposed Will self driving cars become like horses used only by hobbyists for recreation and sport While the focus is on parking the book also contains the views of real estate economists architects and policymakers and is essential reading for real estate developers and investors transport economists planners politicians and policymakers who need to consider the implications of a future with more driverless vehicles Fasten your seat belt like it or not driverless cars will begin to change the way we move about our cities within ten years **Digital**

**Business Models in the Mobility Sector** Gerrit Remané, 2017-06-02 Recent advances in digital technologies have initiated a fundamental digital transformation of the mobility sector This shift means that managers must understand new digital business models such as carsharing ridesharing and crowd navigation For research the digital transformation of the mobility sector is an especially interesting phenomenon as it is different from transformations in other sectors in the way that digital technologies must be combined with physical products This thesis turns to the business model concept to increase the understanding of the above described phenomenon by investigating three research questions 1 Along which business model components do existing products and services in the mobility sector differ 2 What new types of digital business models have emerged in the mobility sector 3 How can firms use business model components and business model types for business model innovation **You Are Here** Hiawatha Bray, 2014-04-01 The story of the rise of modern navigation technology from radio

location to GPS and the consequent decline of privacy What does it mean to never get lost You Are Here examines the rise of our technologically aided era of navigational omniscience or how we came to know exactly where we are at all times In a sweeping history of the development of location technology in the past century Bray shows how radio signals created to carry telegraph messages were transformed into invisible beacons to guide ships and how a set of rapidly spinning wheels steered submarines beneath the polar ice cap But while most of these technologies were developed for and by the military they are now ubiquitous in our everyday lives Our phones are now smart enough to pinpoint our presence to within a few feet and nosy enough to share that information with governments and corporations Filled with tales of scientists and astronauts inventors and entrepreneurs You Are Here tells the story of how humankind ingeniously solved one of its oldest and toughest problems only to herald a new era in which it's impossible to hide International GAAP 2019 Ernst & Young
