Breaking the Cycle Peter Banning, 2000-09-01 This book presents a fresh look at stopping the cycle of child molestation by attacking the source the child molester instead of trying to deal with the end product of abuse the victim survivor The book is broken into two parts Chapters 1 through 4 address the issues of the child molestor and what can be done to stop the molestor's cycle of abusing

children Chapters 5 through 8 are to help those who are dealing with either the offender or the survivor of the child sexual abuse Parents of sexually abused children may find the answers they are seeking Spouses of offenders may come to understand a part of their offending spouse that has been a dark mystery Various victims of sexual abuse should find this book of interest It deals with the offenders of sexual abuse and what can and should be done to stop them This is done by exposing the faulty logic used by offenders It attacks their basic personality life style and erroneous thought processes There is no attempt to justify the behavior of the child offender There is no softening of the effect of the abusers past behavior It exposes the make up of the offender and suggests a path of recovery from this dysfunctional behavior This approach opens a door long closed to look beyond the therapeutic treatment of child molesters to reveal what works and what does not and why The hope is to develop answers for the generic question many victims ask WHY as well as answer the specific question WHY ME Although a lot of research has been done on this subject this book is not one of theory but of experiences It relates to the therapeutic experience with examples This should not be considered a How to book but more a guide for those wanting to recover This book also addresses the concerns of those close to the offender If you have been thrown into having to deal with child sexual abuse you will find answers to many of your questions What you can or should expect from the legal system from therapy from social welfare department is discussed It addresses such questions as Why didn t I see it or How could they in a light seldom revealed Some questions as Will I ever be normal or Will anyone ever be able to love me for who I really am are on the minds of offenders and victims Some of these answers lie within this book A very fundamental area facing the issue and treatment of sexual abuse is gender Historically the male is the stereotypical abuser and the female is the stereotypical victim This is one of the many myths of childhood sexual abuse Female child molesters make up almost 40% of the child molesting population For every two girls sexually abused slightly more than one boy is abused While the book was written with stereotypical male offender in mind it can be used by female child molesters and male victims This book tries to address the gender problem by avoiding gender terms unless appropriate Avoiding gender terms is not possible without some redefinition of the use of pronouns The only non gender singular possessive pronoun is its This is also a non human possessive term and inappropriate in describing the issues of already wounded individuals The non gender pronouns used throughout this book are they them their which are normally used as plural forms In this book these terms are used as non gender singular as well as non gender plural forms While this is not proper usage the narrative is easier to read than if the alternate forms of s he or he she or his hers were used There is no easy solution to this problem Examples and experiences used to demonstrate a point may be a composite of experiences from various victims and offenders The names used have been changed unless permission was granted otherwise Gender terms used in the examples are correct Abstr

The Science of Intelligent Achievement Isaiah Hankel,2017-11-30 Smart strategies for pragmatic science based growth and sustainable achievement The Science of Intelligent Achievement teaches you the scientific process of finding success through your most valuable assets Selective focus how selective are you with who and what you let into your life Creative ownership how dependent are you on others for your happiness and success Pragmatic growth how consistently and practically are you growing daily First this book will show you how to develop your focus by being very selective with where you spend your mental energy If you ve failed to reach an important goal because you were distracted misinformed or overcommitted then you know the role focus and selectivity play in achievement Second you will learn how to stop allowing your happiness and success to be dependent on

other people and instead start taking ownership over your life through creative work Finally you will learn the art of changing your life through pragmatic decisions and actions Self improvement is not the result of dramatic changes Instead science has shown that personal and professional change is initiated and sustained by consistent practical changes To grow you must leverage the power of micro decisions personality responsibility and mini habits Your own biology will not let you improve your life in any other way What do you currently value What are working to attain Have you been taught to value your job title or your relationship with some other person above all else Have you been convinced that the most valuable things in life are your paycheck the number of people who say hello to you at the office and the number of people who say I need you at home Or have you become so passive in what you value that you let anyone and anything into your life as long as whatever you let in allows you to stay disconnected from the cold hard truth that when things really go wrong in your life the only person who will be able to fix it and the only person will be responsible for it is you If so welcome to fake success Passivity dependence and the sacrifice of practical thinking and personal responsibility to fuzzy grandiose ideals and temporary feelings these are markers of fake success Intelligent Achievement on the other hand is not a moving target It s not empty either Instead it s sturdy full and immovable It s not something that s just handed to you It s not something you re nudged to chase or coerced into wanting Intelligent Achievement comes from within you It s a collection of values that are aligned with who you are values you have to protect and nurture These values do not increase your dependence on other people and things Instead they relieve you of dependence This kind of achievement is something that you have a part in building from the ground up you know what s in it you chose it someone else didn t choose it for you Achieving real success means you must focus create and grow daily The Science of Intelligent Achievement will show you how *ADVERTISING AND THE SPREAD OF BUSINESS, DEMOCRACY AND KNOWLEDGE* STEVE Dr. ESOMBA,2012-06-06 The culture of advertising our needs desires interests and products is deeply embedded in human nature It is also a universal natural tendency We advertise ourselves our activities and products for a wider audience to evoke interest entertain educate impart knowledge and spread corporate interests democratic ideals competitiveness and world knowledge *ADVERTISING AND THE SPREAD OF BUSINESS DEMOCRACY AND KNOWLEDGE* demonstrates that advertisements do not only benefit industry and corporations as taken for granted but they also benefit the public in spreading cultivating and practising democracy and free speech and inculcating knowledge Think of this every time you see an advertisement **Playing** Paul Kuritz,1989-07-18
