Petrocelli, 2025-09-23 Expanding upon his viral TEDx Talk psychology professor and social scientist John V Petrocelli reveals the critical thinking habits you can develop to recognize and combat pervasive false information that harms society in The Life Changing Science of Detecting Bullshit Bullshit is the foundation of contaminated thinking and bad decisions leading to health consequences financial losses legal consequences broken relationships and

wasted time and resources No matter how smart we believe ourselves to be we re all susceptible to bullshit and we all engage in it While we may brush it off as harmless marketing sales speak or as humorous embellished claims it s actually much more dangerous and insidious It s how Bernie Madoff successfully swindled billions of dollars from even the most experienced financial experts with his Ponzi scheme It s how the protocols of Mao Zedong s Great Leap Forward resulted in the deaths of 36 million people from starvation Presented as truths by authority figures and credentialed experts bullshit appears legitimate and we accept their words as gospel If we don t question the information we receive from bullshit artists to prove their thoughts and theories we allow these falsehoods to take root in our memories and beliefs This faulty data affects our decision making capabilities sometimes resulting in regrettable life choices But with a little dose of skepticism and a commitment to truth seeking you can build your critical thinking and scientific reasoning skills to evaluate information separate fact from fiction and see through bullshitter spin In *The Life Changing Science of Detecting Bullshit* experimental social psychologist John V Petrocelli provides invaluable strategies not only to recognize and protect yourself from everyday bullshit but to accept your own lack of knowledge about subjects and avoid in engaging in bullshit just for societal conformity With real world examples from people versed in bullshit who work in the used car real estate wine and diamond industries Petrocelli exposes the red flag warning signs found in the anecdotal stories emotional language and buzzwords used by bullshitters that persuade our decisions By using his critical thinking defensive tactics against those motivated by profit we will also learn how to stop the toxic misinformation spread from the social media influencers fake news and op eds that permeate our culture and call out bullshit whenever we see it

Biohackers Magazine Issue 11 Biohackers , The world and the humans share a special bond together The world is a place full of vibrant life unpredictable events and a sort of beautiful self sustaining chaos The Human being s journey on this Earth is one that is corporeal yet also deeply spiritual The world presents so many things into our lives that often we forget that we are more than just what invokes responses from our physical senses What separates man from every other creature is his ability to think rationally What man lacks in survival endowments such as long claws fur etc man makes up for in his ability to know Man can think and know that he thinks Man can eat and know that he eats Man can speak and know that he speaks The human being is able to conquer and have dominion over the creatures and the world itself because of this unique ability to know rationally There are many different areas where the human being shows this separation of pure intellect One would be his tool making ability or homo Faber It is true that some monkeys can make tools but it is the only man that makes these tools not just as an extension of their bodily reach but as direct fruition of their thoughts Community Language Science Arts Religion Death and Culture are all elements that show man s rationality his intellect The intellect exists in the soul of man and animates the body through the influence on man s free will Too often we focus on the superficial parts of ourselves and get lost in the mainstream s constant influential assault about how we should be physical While of course we are composed of the body we must remember that it

is the soul that also makes up our life and its health must also be taken into consideration in everything we do We can define a human being as a rational animal a composite of both body and soul Its soul is the subsistent element and its powers involve the knowing intellect and the will to do good With free will aiming toward good and knowledge aiming towards the truth the human being works towards becoming more beautiful in the sense of intentionality of culture Biohacking in its deepest sense must look beyond the temporal world of physiological and temporal matter and adhere to the health and the growth of the human soul We are all on this Earth together and as biohackers we have the mission of increasing our knowledge every single day to feed not only our bodies and brains but most importantly our souls When one chooses to take the time to explore such questions as who they are and how they act and where they are going and what is their purpose they increase their value as a person through this continual development Their soul becomes more of a master over their temporal body and they can live life with perhaps more peace and happiness because of their continued growth and development of their soul which acts through their body
