researchers attempts to foster a comprehensive understanding of the elements that impact scientific research such as clinical trial design communication and publication methods It introduces the process of idea generation and creative critical thinking leading to the development of key concepts that coalesce into theoretical constructs and working hypotheses The book systematically delineates research phases associated with a bench to bedside translational approach providing the full depth and breadth of drug discovery and development design synthesis and optimization of drug candidates interacting with targets linked to diseases as well as clinical trial design to acquire substantial evidence of efficacy and safety for candidate drugs in the target patient population New and evolving topics such as artificial intelligence machine and deep learning drug repurposing approaches and bioinformatics are incorporated into the text as these features are becoming integrated into drug research and development Additionally it covers publication strategies including literature search manuscript preparation data presentation relevant discussion editorial processes elements of peer review and bibliometrics Finally the book addresses grantsmanship key strategies for building effective networks mentorships maintaining research integrity and forging career advancement opportunities including entrepreneurship

Delphi method for evaluating scientific research proposals in a neutrosophic environment Florentin Smarandache, Jesús Estupiñán Ricardo, Erick González Caballero, Maikel Yelandi Leyva Vázquez, Noel Batista Hernández, The scientific research proposal is part of the task to be carried out in academic and research institutions around the world This is a complex decision making problem because decision makers must determine the projects that are appropriate to the subjects addressed by the institution those projects must be achievable within a reasonable deadline they must have the financial means and the budget necessary to be carried out the staff must be sufficiently qualified and an optimum number of personnel must be available to succeed the tasks and not interfere with other research projects
