For years, it has been believed that bodybuilders couldn't follow a vegan diet. People assume that in order to gain muscle, that you have to eat animal products because for many, animal products are the only decent source of protein. While it is true that you need protein to build muscle, you can get plenty of protein from plant sources. As a dietitian, I want to help you make the changes to your diet that you want to and still do the workouts you love. There are a lot of myths out there about veganism and bodybuilding, and if you are a bodybuilder who wants to eat vegan, you may find it hard to figure out how to do so. People choose veganism for many reasons, and the reason you want to switch to this new diet isn't important. The only thing that is important is that yes, you can eat vegan and be a bodybuilder. I want to help prove to you that you can have all the energy you need as well as the protein to be a successful bodybuilder and reach the gains that you have been striving for. In this book, you will find the best vegan supplements that will boost your workouts and energy. The top bodybuilding advice that can prevent gains.
