O'Sullivan ,2016-04-25 This is the most comprehensive catalog of educational technology If you like the concepts of universal design for learning this book will bring you to the next level with technology The book outlines the very best educational technology to reach special education students diverse learners and engage all students in the learning process There is a new generation of low cost technology to help reach challenging students like never before This gives teachers countless tools to include in your UDL toolbox and enhances your teaching

Mathematics Worksheets Don't Grow Dendrites Marcia L. Tate, 2008-08-21 The author does a good job of describing the NCTM content standards and providing examples that incorporate recommendations from NCTM and other experts in the field on how best to deepen students understanding of mathematics Linda Kallam Professor of Mathematics Southeastern Oklahoma State University A very useful resource for new and experienced teachers The book will also equip administrators with strategies that they can model in staff meetings and with teachers Pam Summers K 12 Mathematics Coordinator Lubbock Independent School District TX Engage students in effective meaningful experiences in mathematics Students engaged in active learning experiences gain long term retention of the skills and content they learn In this user friendly guide Marcia L Tate follows the successful format of her previous bestsellers and offers math teachers 20 powerful brain based teaching strategies that translate into meaningful firsthand experiences for all learners Mathematics Worksheets Don t Grow Dendrites provides educators with creative ways to incorporate visual auditory kinesthetic and tactile modalities and promote increased academic achievement in mathematics The author also focuses on the core NCTM focal points for algebra geometry numbers and operations data analysis and probability problem solving reasoning and proof communication connections and representation The chapters offer A what why and how for each strategy Specific brain compatible mathematics activities and lessons submitted by real teachers from across the country Space for teachers to reflect on and apply individual strategies in their lessons With a bibliography of math and literature resources and a lesson planning guide this book can transform classrooms into places where students excel academically and where learning is fun

Rethinking Disability and Mathematics Rachel Lambert, 2024-04-15 Every child has a right to make sense of math and to use math to make sense of their worlds Despite their gifts students with disabilities are often viewed from a deficit standpoint in mathematics classrooms These students are often conceptualized as needing to be fixed or remediated Rethinking Disability and Mathematics argues that mathematics should be a transformative space for these students a place where they can discover their power and potential and be appreciated for their many strengths Author Rachel Lambert introduces Universal Design for Learning for Math UDL Math a way to design math classrooms that empowers disabled and

neurodiverse students to engage in mathematics in ways that lead to meaningful and joyful math learning The book showcases how UDL Math can open up mathematics classrooms so that they provide access to meaningful understanding and an identity as a math learner to a wider range of students Weaved throughout the book are the voices of neurodiverse learners telling their own stories of math learning Through stories of real teachers recognizing the barriers in their own math classrooms and redesigning to increase access the book Reframes students with disabilities from a deficit to an asset perspective paving the way for trusting their mathematical thinking Offers equitable math instruction for all learners including those with disabilities neurodiverse students and or multilingual learners Applies UDL to the math classroom providing practical tips and techniques to support students cognitive affective and strategic development Immerses readers in math classrooms where all students are engaged in meaningful mathematics from special education day classes to inclusive general education classrooms from grades K 8 Integrates research on mathematical learning including critical math content such as developing number sense and place value fluency with math facts and operations and understanding fractions and algebraic thinking Explores critical issues such as writing IEP goals in math This book is designed for all math educators both those trained as general education teachers and those trained as special education teachers The UDL Math approach is adapted to work for all learners because everyone varies in how they perceive the world and in how they approach mathematical problem solving When we rethink mathematics to include multiple ways of being a math learner we make math accessible and engaging for a wider group of learners
