Excel 2007 Matthew MacDonald, 2006 Microsoft Excel continues to grow in power sophistication and capability but one thing that has changed very little since the early 90s is its user interface The once simple toolbar has been packed with so many features over the years that few users know where to find them all Microsoft has addressed this problem in Excel 2007 by radically redesigning the user interface with a tabbed toolbar that makes every feature easy to locate and use

Unfortunately Microsoft's documentation is as scant as ever so even if users can find advanced features they probably won't know what to do with them Excel 2007 The Missing Manual covers the entire gamut of how to build spreadsheets add and format information print reports create charts and graphics and use basic formulas and functions Like its siblings in the Missing Manual series this book crackles with a fine sense of humor and refreshing objectivity about its subject guiding readers through the new Excel with clear explanations step by step instructions lots of illustrations and friendly time saving advice It's a perfect primer for small businesses with no techie to turn to as well as those who want to organize household and office information

The Encyclicon - Volume 4 Thomas L. Saaty, Madjid Tavana, 2021-03-02 Volume 4 has a very large number of more recent case studies and takes a closer look to the building process of the Benefits Opportunities Costs and Risks models using AHP top level networks rating of the B O C R with the help of the strategic criteria and ANP bottom level networks The Encyclicon is an advanced dictionary of structures used to represent complex decisions The first dictionary of hierarchic decision making was the Hierarchon Since hierarchies are a special case of networks the examples given here can be regarded as more general and complete representation of decision making In particular except for a group of market share examples they all involve decisions made by considering Benefits B Opportunities O Costs C and Risks R They also involve a synthesis of these BOCR merits into a single overall best outcome for a decision This is the first volume of the series of Encyclicon books Each of the books contains different models from different years collected by a different author along with Thomas L Saaty and although all books tackle similar topics there are different models and different approaches on how to summarize and represent models for general use These books are meant as a reference guide when you try to set up ANP or AHP complex decision models The case studies in the books are linked to online reference material related to that which often include the super decision model power point presentation and the original report of the case
