

A woman in a red dress is shown from the waist up, holding an Oscar statuette. She is positioned in the center of the frame. The background is a vibrant red with numerous vertical and diagonal streaks of light, creating a dynamic and celebratory atmosphere. The word "OSCAR" is written in large, bold, gold letters, and the word "Predictions" is written in a gold cursive script below it.

Predicting Movie Success at the Box Office Barrie Gunter, 2018-02-20 This book explores the different factors that can influence a new movie's prospects at the box office. Looking at factors such as the production budget, distribution model, genre, stars, and audience reactions of films, Gunter asks how such aspects may reduce the uncertainties of success so common in the movie industry. The reader is taken on a journey through filmmaking factors that research suggests impact box office performance. While box office revenues represent only part of a movie's earning potential, Gunter highlights how theatrical performances remain central to what the movie business is about. The chapters illustrate how ticket sales are largely influenced by the production budget but also cultural differences and new movie platforms. **Film Review**, 2007

Movie Analytics Dominique Haughton, Mark-David McLaughlin, Kevin Mentzer, Changan Zhang, 2015-10-05 Movies will never be the same after you learn how to analyze movie data including key data mining, text mining, and social network analytics concepts. These techniques may then be used in endless other contexts. In the movie application, this topic opens a lively discussion on the current developments in big data from a data science perspective. This book is geared to applied researchers and practitioners and is meant to be practical. The reader will take a hands-on approach running text mining and social network analyses with software packages covered in the book. These include R, SAS, Knime, Pajek, and Gephi. The nitty-gritty of how to build datasets needed for the various analyses will be discussed as well. This includes how to extract suitable Twitter data and create a co-starring network from the IMDB database given memory constraints. The authors also guide the reader through an analysis of movie attendance data via a realistic dataset from France. **Editor & Publisher**, 1982

How to Predict the Unpredictable William Poundstone, 2014-09-04 We are hard-wired to believe that the world is more predictable than it is. We chase winning streaks that are often just illusions, and we are all too predictable exactly when we try hardest not to be. In the 1970s, Daniel Kahneman and Amos Tversky coined the phrase "representativeness" to describe the psychology of this behaviour. Since then, representativeness has been used by auditors to catch people fiddling their tax returns and by hedge fund managers to reap billions from the emotions of small investors. Now Poundstone, for the first time, makes these techniques fun, easy, and profitable for everyone in the everyday situations that matter. You'll learn how to tackle multiple choice tests, what internet passwords to avoid, how to up your odds of winning the office Premier League sweepstakes, and the best ways to invest your money. *The Review of Reviews* William Thomas Stead, 1899 *Review of Reviews* Albert Shaw, 1893 *The Review of Reviews* Albert Shaw, 1893 **The Review of reviews**, 1893 **American Monthly Review of Reviews** Albert Shaw, 1893 *Malignant Assumptions* Carrie Rubin, 2024-08-27 an exciting and satisfying read.
