Ethics in Social Science Research in Indonesia Mayling Oey-Gardiner, Fandy Rahardi, Canyon Keanu Can, 2023-07-09
This textbook presents ethical guidelines for conducting research in the social sciences focused on Indonesia. As a country with a fast growing research environment, the real life cases of ethical issues that arise in Indonesia can teach both aspiring and established researchers how to approach the complexity of research ethics and dilemmas. With technological advancement affecting how research is conducted, the necessary ethical guidelines for research are also evolving. The instantaneous nature of information movement has made confidentiality in research data more critical than before, and any negligence in protecting research participants has an unprecedented scope of damage. The methods book synthesises hundreds of worldwide ethical guidelines and past issues that social science researchers will find highly relevant. Arranged chronologically to represent each research stage from research preparation to post research, the book prepares researchers to mitigate ethical crises. Relevant to all social scientists, both emerging and established, conducting research in Indonesia, this co-published textbook between Springer and OBOR is also relevant to researchers beyond the archipelago. It is also an indispensable teaching resource for lecturers in research methods and ethics across social science disciplines. [Ethics In Social Science Research In Indonesia](#) Mayling Oey- Gardiner, Fandi Rahardi, dan Canyon Keanu Can, 2021-04-08
There are not many books on ethics that are currently available, especially in Indonesia. This book comes to fill that gap. A commendable book that researchers should read, especially when there is more and more research on human behavior. It is a stupendous work. M Chatib Basri, Executive Director IBER, Minister of Finance of the Republic of Indonesia, 2013-2014. This book addresses an important set of issues in the context of Indonesia, a large developing country in Southeast Asia. Most work on research ethics has originated in the developed world; the strength of this book is that it relates the large international literature to the specific problems which Indonesian researchers are likely to face, especially in the social sciences. It deserves a wide readership both in Indonesia and in other parts of the world. Anne Booth, Professor Emeritus, SOAS University of London. In a world full of fake news, corrupt bureaucracies, and inequitable judgements, it is vital that the training of rising generations of social scientists contains thorough grounding in ethics. This volume should be required reading in all teaching programs and a valuable addition on the desk of all graduates wishing to pursue a career in the social research professions. Terence H Hull, Emeritus Professor of Demography, The Australian National University. Reading this book is an eye-opening experience. Mayling Oey Gardiner presents novelty by discussing ethics in social science research on current issues such as big data, internet-based research, and environmental research. This book can guide academics and decision makers to define boundaries and consider the impact of social research.
