Nonlinear Video and TV Applications Using IPv6 and IPv6 Multicast identifies five emerging trends in next generation delivery of entertainment quality video. These trends are observable and can be capitalized upon by progressive service providers, telcos, cable operators and ISPs. This comprehensive guide explores these evolving directions in the TV video services industry including worldwide deployment of IPv6 IPTV services, web produced video content and the plethora of different screens available from TV to iPad. It offers practical suggestions as to how these technologies can be implemented in service provider networks to support cost effective delivery of entertainment and how new revenue generating services can be brought to market. Important topics include: Evolving video consumption habits and possible network implications; An overview of IPv6 address capabilities, protocols, quality of service (QoS) and more; Process descriptions of IP multicast and IPv6 multicast approaches and challenges; A detailed overview of IPTV systems and technologies including architectural requirements, QoE and QoS, security and content protection networks and more; Internet based TV technologies, streaming content distribution networks, P2P networks and cloud computing; Non traditional video content sources and their implications. Linear and Nonlinear Video and TV Applications Using IPv6 and IPv6 Multicast is indispensable reading for planners, CTOs and engineers at broadcast TV operations, Cable TV operations, satellite operations, Internet and IS providers, telcos and wireless providers.
