The Power of Ethics Susan Liautaud, 2021-01-05 The essential guide for ethical decision making in the 21st century The Power of Ethics depicts ethical decision making not in a nebulous philosophical space but at the point where the rubber meets the road Michael Schur producer and creator of The Good Place It's not your imagination we're living in a time of moral decline Publicly we're bombarded with reports of government leaders acting against the welfare of their constituents companies prioritizing profits over health safety and our best interests and technology posing risks to society with few or no repercussions for those responsible Personally we may be conflicted about how much privacy to afford our children on the internet how to make informed choices about our purchases and the companies we buy from or how to handle misconduct we witness at home and at work How do we find a way forward Today's ethical challenges are increasingly gray often without a clear right or wrong solution causing us to teeter on the edge of effective decision making With concentrated power structures rapid advances in technology and insufficient regulation to protect citizens and consumers ethics are harder to understand than ever But in The Power of Ethics Susan Liautaud shows how ethics can be used to create a sea change of positive decisions that can ripple outward to our families communities workplaces and the wider world offering unprecedented opportunity for good Drawing on two decades as an ethics advisor guiding corporations and leaders academic
