Mathematical Circle Diaries, Year 1 Anna Burago, 2013 Early middle school is a great time for children to start their mathematical circle education. This time is a period of curiosity and openness to learning. The thinking habits and study skills acquired by children at this age stay with them for a lifetime. Mathematical circles with their question-driven approach and emphasis on creative problem solving have been rapidly gaining popularity in the United States. The circles expose children to the type of mathematics that stimulates development of logical thinking, creativity, analytical abilities, and mathematical reasoning. These skills, while scarcely touched upon at school, are in high demand in the modern world. This book contains everything that is needed to run a successful mathematical circle for a full year. The materials distributed among 29 weekly lessons include detailed lectures and discussions, sets of problems with solutions and contests, and games. In addition, the book shares some of the know-how of running a mathematical circle. The curriculum, which is based on the rich and long-standing Russian math circle tradition, has been modified and adapted for teaching in the United States. For the past decade, the author has been actively involved in teaching a number of mathematical circles in the Seattle area. This book is based on her experience and on the compilation of materials from these circles. The material is intended for students in grades 5 to 7. It can be used by teachers and parents with various levels of expertise who are interested in teaching mathematics with the emphasis on critical thinking. Also, this book will be of interest to mathematically motivated children. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents, and teachers, and the mathematics profession.

Ben Amanda Stevens, 2020-03-25 From the winner of the Western Downs Library Mini Romance Competition 2011. Set in the hills of Rathdowney where the shadows stretch for miles up lush green valleys, this is the story of a woman, Cora Brantly, who returns home to raise cattle and to raise her sons in the place that she herself was raised. When a truck loaded with her cattle rolls over when cows are calving, when fences are down and a fox invades the hen house, she has only herself to rely on. But it's not all hardship; there are shows to go to, family to reunite with, rodeos to attend, and handsome new friends to make. I have just finished reading your book. I must say I enjoyed reading it. It has a great story to it, and unlike a lot of novels, the author is well acquainted with the subject. I loved the relationship between the boys and their grandmother. K. Z. Will be telling my girlfriends to add Ben to their reading list. Love the book. L. C.

Elementary Classroom Management Carol Simon Weinstein, Andrew J. Mignano, 1997 An introduction to classroom management in elementary schools. The text combines what research has to say about effective classroom management with knowledge culled from practice.
