Charting Limits on Trademark Rights Haochen Sun,Barton Beebe,2023 Trademark scholarship has focused largely on the protection of trademark rights against consumer confusion and the dilution of trademarks Studies of limitations on trademark rights meanwhile have remained relatively peripheral especially in jurisdictions outside of the United States However this reality is incongruous with the importance of the limitations such as descriptive and nominative uses in promoting freedom of commerce market competition free speech and cultural dynamics Against this backdrop *Charting Limitations on Trademark Rights* is the first comprehensive academic volume detailing limitations in trademark rights from both theoretical and comparative perspectives The book presents new theoretical perspectives to justify trademark rights limitations re examines the nature of these limitations delineates the scope of the limitations and offers comparative studies of the limitations With contributions from leading trademark scholars in the EU US and Asia this is a must read for scholars students practitioners and policymakers with an interest in the theories policies and doctrines of trademark law

Virus of the Mind Richard Brodie,2009-05-15 *Virus of the Mind* is the first popular book devoted to the science of memetics a controversial new field that transcends psychology biology anthropology and cognitive science Memetics is the science of memes the invisible but very real DNA of human society In *Virus of the Mind* Richard Brodie carefully builds on the work of scientists Richard Dawkins Douglas Hofstadter Daniel Dennett and others who have become fascinated with memes and their potential impact

on our lives But Richard goes beyond science and dives into the meat of the issue is the emergence of this new science going to have an impact on our lives like the emergence of atomic physics did in the Cold War He would say the impact will be at least as great While atomic bombs affect everybody's life viruses of the mind touch lives in a more personal and more pernicious way Mind viruses have already infected governments educational systems and inner cities leading to some of the most pervasive and troublesome problems of society today youth gangs the welfare cycle the deterioration of the public schools and ever growing government bureaucracy Viruses of the mind are not a future worry they are here with us now and are evolving to become better and better at their job of infecting us The recent explosion of mass media and the information superhighway has made the earth a prime breeding ground for viruses of the mind Will there be a mental plague Will only some of us survive with our free will intact Richard Brodie weaves together science ethics and current events as he raises these and other very disturbing questions about memes
