beaten them by days Bitterly disappointed Scott and his companions returned to base camp but were caught in a fierce Antarctic blizzard that raged for days Too weak to pull their sleds and out of food and fuel they froze to death Ironically as if to underscore the litany of errors that dogged the expedition they perished only a few miles from a cache of food and fuel Next spring Wright led a search party to look for the remains of Scott and his party and it was the sharp eyed Wright who spotted a small patch of green on a snowy landscape the tent containing Scott and his companions frozen bodies Wright returned to England and went on to do even more extraordinary things including inventing trench wireless in WWI and working closely with Winston Churchill developing the technology to assist in the allied invasion of Europe in WWII which included developing the first radar installations and inventing the technology that neutralized German magnetic sea mines After a stint as naval attach to Washington D C and Director of Scripps Oceanographic institute in La Jolla California he retired to Salt Spring Island BC passing away in 1975 Typically Canadian Wright was modest about his accomplishments with few Canadians aware of his amazing life and the extraordinary impact he had on the 20th century
