Debt, Development, and Democracy Jeffry A. Frieden,2018-06-05 In the 1970s and 1980s the countries of Latin America dealt with their similar debt problems in very different ways ranging from militantly market oriented approaches to massive state intervention in their economies while their political systems headed toward either democracy or authoritarianism Applying the tools of modern political economy to a developing country context Jeffry Frieden analyzes the different patterns of national economic and political behavior that arose in Argentina Brazil Chile Mexico and Venezuela This book will be useful to those interested in comparative politics international studies development studies and political economy more generally Jeffry Frieden weaves together a powerful theoretical framework with comparative case studies of the region s five largest debtor states The result is the most insightful analysis to date of how the interplay between politics and economics in post war Latin America set the stage for the dramatic events of the 1980s Carol Wise Center for Politics and Policy Claremont Graduate School

international policy issue awash in myths moral inconsistencies social prejudices and political rhetoric it's no wonder students find the international drug trade an alluring topic to study and discuss With his brief and engaging new book David Mares explores the reasons why there is so much disagreement among nations about which policies are most appropriate to address drug production distribution and trade From the more tolerant coffee house style policies of the Netherlands which focus on public health concerns to the United States just say no drug war approach nations frame and seek to resolve these issues in very different ways and with different levels of success This variation creates a host of global cooperation and policy coordination problems making Drug Wars and Coffee Houses an ideal supplement for giving students an opportunity to apply the larger themes of any political economy course to a substantive policy area A compelling framework focusing on political economic ideas and analysis shows students how leaders and policymakers need to understand the drug trade as a full blown commodity system if they are to impact its different segments As he discusses drug production consumption distribution and money laundering Mares carefully shows what insights micro political economic realist constructivist and social deviant perspectives each bring to bear on the problem And through the book's use of extended case studies this text offers students an inside look at a complex and fascinating policy area from Sweden's attempts to enforce drug war style policies to the UK's movement towards decriminalization to the responses of such international organizations as the United Nations and the European Union A comprehensive bibliography of websites articles and book length studies point to further research on the topic while class tested research and study questions for each chapter will jumpstart class discussions and projects

Michael J. Twomey, 1993-07-30 This study provides a timely and useful benchmark for analysis of the effects of the recently negotiated North American Free Trade Agreement on investment flows It also presents a unified history of foreign investment in Canada Mexico and the United States over the twentieth century stressing interactions among these countries and their changing policies towards inward and outward investment Twomey analyzes economic theories of foreign investment from the perspectives of neoclassical economics and political science and places them in the context of the ongoing debate over neo protectionist policies and the role of the United States in the global economy **Lateinamerika**, 1989 **A Marriage of Convenience** Sidney Weintraub, 1990 A comprehensive account of recent developments in the relationship between MEXICO and the U S and the ways in which internal developments in each country have affected the other Agribusiness and Farmers in Mexico Theodore Dehesa, 1990 **Security, Democracy, and Development in U.S.-Latin American Relations** University of Miami. the North American Free Trade Agreement on the U.S. and Mexican Fresh Vegetable Industries and Trade Jaime Enrique Javier Malaga, 1997 **Farewell To The Peasantry?** Gerardo Otero, 1999-05-06 Focusing on three Mexican agricultural regions from the 1930s to the present Gerardo Otero's *Farewell to the Peasantry* Political Class Formation in Rural Mexico offers a strikingly new analysis of the intersection of class relations political mobilization and regionally varying cultural heritage in rural Mexico With the prevailing agrarian social structure as his backdrop Otero examines the social and political circumstances under which different regions have evolved and the transformations in class structure that have resulted Otero maintains that political class formation is the fundamental process by which civil society is constructed and a vital part in the transition toward a societal democracy Otero also addresses Mexico's legendary agrarian reform program arguing that land redistribution was enacted by the leaders of Mexico specifically because of its power to entrench capitalism in the modern Mexican state Avoiding unidirectional or single factor approaches in favor of presenting a broader spectrum *Farewell to the Peasantry* Political Class Formation in Rural Mexico will interest serious academics and casual readers alike
