Pentagon Paradox The Development Of The F18 Hornet:

The Pentagon Paradox James Perry Stevenson, 1993 Did the U.S. Navy avoid Congress s explicit direction to navalize the winning design in a flyoff competition by lying to Congress with the argument that the winner was not carrier capable and then develop the losing aircraft into an even worse fighter for its carrier squadrons To find the answer James Stevenson an experienced aviation writer dug through government files and interviewed key players to present this hard hitting behind the scenes account of the development of one of the Navy's current front line aircraft His investigation exposes the politics of Pentagon weapons procurement a process that pits service against service the military against Congress admirals against generals pilots against engineers hard liners against reformers This book provides a developmental history of the F 18 Hornet from drawing board to its results in Desert Storm It is the story of a multi billion dollar aircraft design war between those military officers who insist that America's interests will be protected best by sophisticated aircraft even if America can afford fewer of them and a group known as the Fighter Mafia who claim that larger numbers have always won in warfare and that for equal dollars America can only produce greater numbers if each one is less sophisticated He shows that by picking the YF 17 and renaming the F 17 as the F 18 over the clearly superior YF 16 the Navy antagonized the Air Force Congress and its own F 14 community and sparked a major legal battle Undeterred the Navy took the light cheap YF 17 and loaded it with technology and weight which produced an F 18 that has less maneuverability less acceleration a range no better than the 1952 vintage A 4 and costs almost three times as much as the F 16 From its first flight in 1978 the F 18 performance continued to degrade Nevertheless in 1992 the Navy asked for additional money to modify the F 18 as the F 18E F This request was in reality funding for a brand new aircraft which Stevenson calls the F 19 designed to get back to the original requirements and help bail out the financially troubled McDonnell Douglas In this highly readable study Stevenson takes the reader into the Pentagon's corridors of power where test results are distorted history rewritten and requirements changed to match aircraft performance and the public s trust and treasure squandered Fascinating yet sobering The Pentagon Paradox will appeal to everyone interested in the military establishment the future of U S forces and how tax dollars are spent

The Pentagon Paradox James P. Stevenson,1998-09-01 Provides a developmental history of the F 18 Hornet from drawing board to Desert Storm It is the story of a multi billion dollar aircraft design war between those officers who insist that our interests will be protected best by sophisticated aircraft even if we can afford fewer of them and a group known as the Fighter Mafia who claim that larger numbers have always won in warfare even if each one is less sophisticated This highly readable study takes the reader into the Pentagon's corridors of power where test results are distorted history rewritten and requirements changed to match aircraft performance and the public's trust and treasure squandered

Wheeler, 2009 America's Defense Meltdown Pentagon Reform for President Obama and the New Congress describes how America's armed forces are manned and equipped to fight at best enemies that do not now and may never again exist and to combat real enemies ineffectively at high human and material cost Given that many regard America s military as the best in the world how can this be In answer to this question 13 non partisan Pentagon insiders retired military officers and defense specialists lay out an array of hard hitting and well documented charges against our current defense establishment They demonstrate that the hugely expensive and excessively complex weapons embraced by the Pentagon and Congress as vital for our national defense are barely adequate for engaging in outmoded 20th century forms of warfare They are woefully inadequate for fighting a 21st century fourth generation war as we ve learned so painfully in Iraq and Afghanistan At least as disturbing is the condition of the US defense budget Over time policy makers of all political

stripes have created budgets that have made our forces smaller less well equipped and less ready to fight all at dramatically increasing cost Fortunately the book s authors offer real world solutions to all the problems they identify At the same time however they remain pessimistic about the prospects for real change arguing that in a system that measures merit by the amount of money spent the reform proposals elaborated in this book are likely to meet intense resistance As Winslow Wheeler remarks The changes require a president with an iron will who will require real not cosmetic reforms of a system determined to and skilled at countering them It will also require a president who will stick with the process for years continuously making decisions that will ultimately reverse the present disastrous course U S national security is now on
