## **People In A Landscape:**

*Rediscovery of Cultural Landscapes in Southern China* Wallace P.H. Chang, 2023-04-28 This book investigates the concept of human landscape in rural settlements in Southern China where communities and their cultural landscapes are facing contemporary challenges following a period of rapid urbanization in the last 50 years While metropolitan cities such as Hong Kong are experiencing accelerated urban development underpopulated rural villages are struggling to maintain the cultural heritage of their regions *Rediscovery of Cultural Landscapes in Southern China* provides a detailed account into indigenous living cultures in traditional rural settlements upon natural landscapes Beginning with an overview of the theoretical framework the book presents six unique cases including Tai O Yim Tin Tsai Lai Chi Wo Nga Tsin Wai Cangdong and Meinong while illustrating a relevant comparison between Hakka and Satoyama landscape systems The spectrum of theoretical and case analyses allows for a rethinking of the evolving cultural landscape s positioning with valuable heritages in the context of a post industrial society The book is written towards reinterpreting the cultural landscape by conceptualizing the human landscape for scholars practitioners and students interested in rural cultural conservation and revitalization heritage management traditional architecture and landscape planning and urban rural development [Library of Congress Subject Headings](#) Library of Congress. Cataloging Policy and Support Office, 2006 **Scribner's Monthly, an Illustrated Magazine for the People** , 1874 **Library of Congress Subject Headings** Library of Congress, 2010

*The Portfolio* , 1886 **Tourism and Environment** F. D. Pineda, 2013-10-16 The contributions contained in this volume deal with two perspectives of tourism and environment the role of the environment in tourism and environmental tourism The same message would be expected in both cases The environment comprises the set of biophysical and cultural events surrounding us and influences the activities developed depending on time and site Among the environmental characteristics of a region climate is usually the most relevant and conditions almost all other components Climate defines much of the natural as well as the urban cultural landscape and the countryside of an area Seasonal environmental change affects the life and culture of each place and largely explains the choice of destination of travellers Environment and landscape therefore give rise to an interesting and varying relationship over the year Thus coastal landscapes are not inherently more beautiful in summer than in other seasons but environmental conditions cause a greater demand in this season Certain places in the world captivate visitors who flock to them in large numbers Local people recognize the benefit of this employers become interested in the economic aspects and so the tourism infrastructure develops The appeal of good climate has led to a change from a rural subsistence culture to a lucrative services economy in some areas Unfortunately however in many cases short sightedness and corruption can lead to the ruin of the natural landscape Situations like this are now common throughout the world due to the environmental mismanagement of tourism Local populations within emerging tourism based economies should learn this lesson The papers included in this volume address important issues related to tourism and the environment

and offer a better understanding of some of the current challenges      *The People's Magazine* ,1870      Understanding the Historical Landscape in Its Environmental Setting T. Christopher Smout,2002 As concern for the countryside becomes ever more serious and agencies are faced with conflicting objectives this book highlights specific concerns from different perspectives that of the archaeologist the geographer the countryside planner the landowner and the forester It examines the efforts these differing bodies are making to understand the environment and illustrating the ways in which each can enrich the other s understanding and management of the landscape      Environmental Psychology Linda Steg,2019-01-22 The updated edition of the essential guide to environmental psychology Thoroughly revised and updated the second edition Environmental Psychology An Introduction offers an overview of the interplay between humans and their environments The text examines the influence of the environment on human experiences behaviour and well being and explores the factors influencing environmental behaviour and ways to encourage pro environmental behaviour The revised edition is a state of the art review of relevant theories and research on each of these topics With contributions from an international panel of noted experts the text addresses a wealth of topics including the main research methods in environmental psychology effects of environmental stress emotional impacts and meanings of natural environment experience aesthetic appraisals of architecture how to measure environmental behaviour cognitive emotional and social factors explaining environmental behaviour effects and acceptability of strategies to promote pro environmental factors and much more This important book Discusses the environmental factors that threaten and promote human wellbeing Explores a wide range of factors influencing actions that affect environmental conditions Discusses the effects and acceptability of approaches that aim to encourage pro environmental behavior Presents research results conducted in different regions in the world Contains contributions from noted experts Written for scholars and practitioners in the field the revised edition of Environmental Psychology offers a comprehensive review of the most recent research available in environmental psychology      *Art-Union* ,1888      **The New Urban Park** Hal Rothman,2004 From Yellowstone to the Great Smoky Mountains America s national parks are sprawling tracts of serenity most of them carved out of public land for recreation and preservation around the turn of the last century America has changed dramatically since then and so has its conceptions of what parkland ought to be In this book one of our premier environmental historians looks at the new phenomenon of urban parks focusing on San Francisco s Golden Gate National Recreation Area as a prototype for the twenty first century Cobbled together from public and private lands in a politically charged arena the GGNRA represents a new direction for parks as it highlights the long standing tension within the National Park Service between preservation and recreation Long a center of conservation the Bay Area was well positioned for such an innovative concept Writing with insight and wit Rothman reveals the many complex challenges that local leaders politicians and the NPS faced as they attempted to administer sites in this area He tells how Representative Phillip Burton guided a comprehensive bill through Congress to establish the park and how he and others expanded the

acreage of the GGNRA redefined its mission to the public forged an identity for interconnected parks and struggled against formidable odds to obtain the San Francisco Presidio and convert it into a national park Engagingly written *The New Urban Park* offers a balanced examination of grassroots politics and its effect on municipal state and federal policy While most national parks dominate the economies of their regions GGNRA was from the start tied to the multifaceted needs of its public and political constituents including neighborhood ethnic and labor interests as well as the usual supporters from the conservation movement As a national recreation area GGNRA helped redefine that category in the public mind By the dawn of the new century it had already become one of the premier national park areas in terms of visitation Now as public lands become increasingly scarce GGNRA may well represent the future of national parks in America Rothman shows that this model works and his book will be an invaluable resource for planning tomorrow's parks **The Photogram**, 1896

*Englisch-Deutsches und Deutsch-Englisches Wörterbuch* Grieb, 1873 **American Forests** Char Miller, 1997 *American Forests* is an interdisciplinary collection of essays that explore the impact of forestry on natural and human landscapes since the mid nineteenth century It has two main goals to present some of the most compelling arguments that have guided our understanding of the complex and evolving relationship between trees and people in the United States and to point out those aspects of this tangled interaction that we have yet fully to understand or to articulate Preface ix , *One Land, Many Landscapes* European Association of Archaeologists. Meeting, 2001 Papers from a session held at the European Association of Archaeologists Fifth Annual Meeting in Bournemouth 1999 This work is the result of an EAA session exploring themes of unity and diversity in the way that archaeologists have come to explore and understand elements of the land of Europe The 17 papers all expanded and re worked since the Bournemouth meeting in this volume were brought together in an attempt to answer such questions and concerns as how can new approaches to past and present landscapes be applied in the field What methodologies are appropriate Do we need to re set the agenda so far as routine survey and recording work are concerned Included are contributions on theoretical issues sites environment relationships field survey and post survey methodology landscape interpretation and regional heritage management and protection With an emphasis on the Stone Age the sites featured range from Russia and Poland to Italy Interior Landscape, 1998 *A Generation Later* James F. Eder, 2000
