**Rights** Gudmundur Alfredsson, Katarina Tomaševski, 2023-09-20 This publication is the second volume of Thematic Human Rights Guides published under the auspices of the Raoul Wallenberg Institute of Human Rights and Humanitarian Law The aim of the Guides as the title implies is to facilitate the use of international human rights standards by their systematic presentation Rather than reproducing full texts of various instruments substantive standards are grouped according to subject matter in order to enable users to quickly and easily locate the topic they may be looking for A detailed index with references to the many international instruments which address the same issue reinforces this thematic approach The choice of human rights and health for the second volume in this series highlights the aim of the Guides to map out the entire range of human rights and fundamental freedoms as they relate to a specific topic The sheer size of this volume illustrates the number and variety of human rights standards relevant for health Many of these standards have been generated by organizations dealing with health rather than human rights and quite a few are found under medical ethics rather than human rights Subsuming medical ethics under international human rights law is a novel development pioneered by the Council of Europe Elsewhere the two fields remain separate and the publication of this Guide is intended to overcome this separation Documents have been included which provide an understanding of human rights within the health profession such as guidance to medical doctors with regard to abortion adopted by the International Medical Association and those human rights safeguards that have been elaborated to prevent abuses by health professionals such as those concerning mental health All of these standards provide a substantive background for inter professional dialogue on the evolving understanding of human rights A Thematic Guide to Documents on Health and Human Rights reflects the full range of issues encompassed by human rights and health Besides the right to health a wide range of rights and freedoms can be and is affected by the health sector Priority has been accorded to the crucial human rights safeguards namely those specifying protection against undue limitations or restrictions upon human rights Much as with any other human rights topic those safeguards are best developed for categories that are most vulnerable to denials and violations of their rights Detainees prisoners victims of armed conflicts children and the mentally ill thus figure prominently

 Rights Wolkite University course Political Science and International Relations language English abstract This paper  
 examines the constitutional and legal derogations or limitations to which the enjoyment of Human Rights could be subjected  
 during a period of a State of Emergency in Ethiopia and explores Ethiopia s compatibility to International Human rights  
 standards The scope of the Research is general and broad because of which it was not possible to identify and elaborate on  
 each and every legislation and provisions that are inconsistent with constitutional and international human rights principles  
 and propose recommendations For example regarding how courts national human right institutions and etcetera are  
 handling domestic application of international human rights instruments is not the scope here The research approach for this  
 study was qualitative one As a matter of the fact that the issue of human rights is subtle and the lack of adequate data system  
 of the legal system a multi methodology approach was deployed Data collection tools employed is a Document analysis  
 qualitative interview and Literature review The study concludes that the declaration of emergency and the resultant  
 derogation of human rights has been the normal form of exercise of state of sovereignty in Ethiopia In addition to the  
 governing norms and principles the country use as a precondition to justify the need to take emergency measures and giving  
 power to the concerned organ a proper institutional and procedural mechanism of checking and necessary control against a  
 possible abuse of emergency powers is vital      *The Medical Times and Gazette* ,1878      The Proportions of the Human
