Friedenspolitik in und für Europa Wolfgang Bergem, Volker Ronge, Georg Weißenö, 2013-03-09 Die Stabilit t des Friedens in Europa und die M glichkeiten seiner Konsolidierung sind in den neunziger Jahren unter ver nderten politischen und paradigmatischen Vorzeichen Gegenstand politikwissenschaftlicher Reflexion wie publizistischer Diskussion Die Ausweitung des Erkenntnisinteresses von Kriegs auf Friesdesursachen und von Kriegsgefahren auf Befriedungschancen erweitert das Spektrum der Forschung und das Verst ndnis von Friedenspolitik Nicht mehr allein die Notwendigkeiten einer auf Vermeidung Einhegung und Beendigung gewaltt tiger Konflikte ausgerichteten Sicherheitspolitik werden in den Blick

Civilization's Crisis: A Set Of Linked Challenges John Scales Avery, 2017-04-20 Modern civilization faces a broad spectrum of daunting problems but rational solutions are available for them all This book explores the following issues 1 Threats to the environment and climate change 2 a growing population and vanishing resources 3 the global food and refugee crisis 4 intolerable economic inequality 5 the threat of

nuclear war 6 the military industrial complex and 7 limits to growth These problems are closely interlinked and their possible solutions are discussed in this book Collected Essays 3 John Scales Avery,2015-11-22 This book contains a collection of essays and articles by John Scales Avery discussing the severe problems and challenges which the world faces during the 21st century Human civilization and the biosphere are threatened by catastrophic climate change Unless rapid steps are taken to replace fossil fuels by 100% renewable energy we risk passing a tipping point beyond which uncontrollable feedback loops could produce a 6th extinction event comparable to those observed in the geological record Another serious threat to human civilization and the biosphere is the danger of a catastrophic thermonuclear war Over a long period of time there is an ever increasing risk that such a war will occur by accident or miscalculation Thirdly there is threat of an extremely serious and widespread famine produced by the climate change rapidly growing populations and the end of the fossil fuel era We must urgently address all three challenges **The Need for a New Economic System** John Scales Avery,2016-02-07 It is clear that our present economic system is unsustainable Never ending exponential industrial growth on a finite planet is a logical absurdity We are already using resources at a rate which it would take 1 6 planet earths to replace We are already undermining the ecological systems which support all of life Our present economic system has led to an unbelievable degree of economic inequality To maintain this inequality both between nations and within nations military force is used and democracy is replaced by oligarchy The future of human civilization is endangered both by the threat of thermonuclear war and by the threat of catastrophic climate change and both of the twin threats are results of our present economic system This book documents in detail the serious economic problems of today s world and it also proposes sustainable solutions
