

response of marvelling at Dr. Jenks' temerity in writing in this way — and reaching for one's hatchet, and the emotional one of marvelling in a somewhat different sense at the author's enthusiasm and vigour in support of what is, non-demonstrably, a good cause. However, one can leave these temptations on one side and draw attention to the fact that there is a lot in the book for those who are interested in the role of law in international society. The author looks, for example, at issues and areas which seem to him to require legal attention and at how both traditional and more recent ways of developing the law might be employed to produce desired results. He also shows that states are already subject to a good deal of "quasilegislation" (p. 186), and discusses how the world's law-making techniques and institutional framework might be improved. Readers may sometimes feel that Dr. Jenks' crusading zeal has got the better of his appreciation of what is practical or even necessary, but the whole is shot through with his vast knowledge and long experience as an international civil servant. It is, therefore, a book which is not only enjoyable for its single-mindedness and valuable as an irritant, but also one from which there is much to be learnt.

Perspectives on Europe is the edited version of a symposium held at Wellesley College, Massachusetts, in April 1969. In addition to a number of eminent American observers of European affairs, such distinguished European scholars as Geoffrey Barraclough, Pierre Hassner, and Walter Laqueur, participated in the symposium's deliberations. Although much of the discussion is inconclusive due both to the nature of the subject matter and the inherent inadequacies of symposia discussion, the book is easy-to-read, contains many anecdotal "gems", and should be of interest to students of European affairs.

The book is divided into four chapters. The first chapter is concerned with attempting to unravel what is meant by Europe today, and is designed as a preparatory overview. The discussion is wide-ranging, but inconclusive — perhaps due to the fact that it revolves around Europe's so-called cultural identity. The second chapter examines economic questions relating to Europe. The principal focus is on the future of the European Economic Community, but other important questions such as the role of Europe in the global economic system are also considered. The third chapter analyses the recent European social unrest. Possibly due to the combination of the facts that the symposium was held in the United States and consisted mainly of academics, an inordinate amount of attention is paid and importance is given to the role of university students more than is perhaps warranted! The final chapter investigates Europe's position in contemporary international politics, particular emphasis being placed on the emerging European detente and the significance of the 1968 Russian invasion of Czechoslovakia for that detente. The most interesting aspect of this discussion and of the symposium as a whole is Professor Hassner's able if brief probing of the effect on relations between the European states of the general climate of relations between the two super powers. This and other related questions are considered more fully in Karl Birnbaum's *Peace in Europe*.

Professor Birnbaum, Director of the Swedish Institute of International Affairs, has provided a stimulating and authoritative study of official policy pronouncements regarding European security during the period 1966-68. His central concern is with the notion of detente and the differing conceptions of it held by the Soviet Union and the major Western states. The result will be of interest to all students of European and inter-
