Peace And Survival:

The Palgrave Encyclopedia of Peace and Conflict Studies Oliver P. Richmond, Gëzim Visoka, 2022-06-21 This encyclopaedia provides a comprehensive overview of major theories and approaches to the study of peace and conflict across different humanities and social sciences disciplines Peace and conflict studies PCS is one of the major sub disciplines of international studies including political science and international relations and has emerged from a need to understand war related systems and concepts and how to respond to it afterward As a living reference work easily discoverable and searchable the Palgrave Encyclopedia of Peace and Conflict Studies offers solid material for understanding the foundational historical and contemporary themes concepts theories events organisations and frameworks concerning peace conflict security rights institutions and development The Palgrave Encyclopaedia of Peace and Conflict Studies brings together leading and emerging scholars from different disciplines to provide the most comprehensive and up to date resource on peace and conflict studies ever produced Co-operation, Contestation and Complexity in Peacebuilding Nadine Ansorg, Eleanor Gordon, 2020-12-30 Security Sector Reform SSR remains a key feature of peacebuilding interventions and is usually undertaken by a state alongside national and international partners External actors engaged in SSR tend to follow a normative agenda that often has little regard for the context in post conflict societies Despite recurrent criticism SSR practices of international organisations and bilateral donors often remain focused on state institutions and often do not sufficiently attend to alternative providers of security or existing normative frameworks of security This edited collection explores three aspects that add an important piece to the puzzle of what constitutes effective Security Sector Reform SSR First the variation of norm adoption norm contestation and norm imposition in post conflict countries that might explain the mixed results in terms of peacebuilding Second the multitude of different security actors within and beyond the state which often leads to multiple patterns of co operation and contestation within reform programmes Third how both the multiplicity of and tension between norms and actors further complicate efforts to build peace or as complexity theory would posit influence the complex and non linear social system that is the conflict affected environment The chapters in this book were originally published as a special issue of the Journal of Intervention and Statebuilding Measuring Peace Richard Caplan, 2019-04-25 How can we know if the peace that has been established following a civil war is a stable peace More than half of all countries that experienced civil war since World War II have suffered a relapse into violent conflict in some cases more than once Meanwhile the international community expends billions of dollars and deploys tens of thousands of personnel each year in support of efforts to build peace in countries emerging from violent conflict This book argues that efforts to build peace are hampered by the lack of effective means of assessing progress towards the achievement of a consolidated peace Rarely if ever do peacebuilding organizations and governments seek to ascertain the quality of the peace that they are helping to build and the contribution that their engagement is making or not to the consolidation of peace More

rigorous assessments of the robustness of peace are needed These assessments require clarity about the characteristics of and the requirements for a stable peace This in turn requires knowledge of the local culture local history and the specific conflict dynamics at work in a given conflict situation Better assessment can inform peacebuilding actors in the reconfiguration and reprioritization of their operations in cases where conditions on the ground have deteriorated or improved To build a stable peace it is argued here it is important to take the measure of peace
