On the Creation of a Peaceful World Engr. Abdul Ghafoor Khan, 2011-11-01 The creation of a peaceful world by natural means of selection is highly unlikely without having the convergence of science with religion in the modern civilization. The American Philosopher Jesse C. Fleming, a retired Associate Professor and the Divya Quran Educational Foundation of India, both provided this convergence when they read my previous book *Terrorists Are Born When the Pairs Break* based on the same basic law of creation which is applied to this study. Dr. Jesse C. Fleming wrote to me: "I appreciate your idea that all existences from quarks to societies only function when there is a balanced complementariness of opposites or pairs and your very logical conclusion that human rights too are possible only when this balance is maintained; otherwise, terrorism wins." Where as the Divya Quran Educational Foundation sent me a letter saying: "We found the book as one of the best Islamic literature far away from religious traditionalism; the base of this book is God created everything in pairs and its detailed presentation singles out this book as the unique great human work." I was profoundly encouraged with the two letters endorsing the convergence of science with the divine religion. We need this convergence for developing a global consensus for the creation of a peaceful world by natural means of selection.
