Setting Performance Standards Gregory J. Cizek, 2012-03-22 Setting standards of performance is a ubiquitous task in education licensure certification and credentialing. It is found in elementary schooling, the professions, commercial applications, and governmental and private organizations. It is one of the most complex, controversial, and vexing issues facing specialists and policy makers today. This second edition solidifies *Setting Performance Standards* as the only book providing a comprehensive profile of both the issues and the how-to methods that define this thorny field. Four chapters have been removed, 11 chapters have been added, 2 chapters have major revisions, and all chapters have been updated. Comprehensive Part I provides a conceptual overview of standard setting and its overarching issues. Part II provides practical how-to information on the newest standard setting methods. Part III provides information and advice on persistent and potential challenges in standard setting. Practical Part II, the heart of the book, reviews 16 of the newest standard setting methods far more than any other book. Expertise: Most of the well-known authors from the 1st edition return with authors of equal stature contributing new chapters.

Technology's Edge Lisa Barrow, Lisa Markman, Cecilia Elena Rouse, 2008 We present results from a randomized study of a well-defined use of computers in schools: a popular instructional computer program for pre-algebra and algebra. We assess the program using a test designed to target pre-algebra and algebra skills. Students randomly assigned to computer-aided instruction scored 0.17 of a standard deviation higher on pre-algebra/algebra tests than students randomly assigned to traditional instruction. We hypothesize that the effectiveness arises from increased individualized instruction as the effects appear larger for students in larger classes and in classes with high student absentee rates.

The Turnaround Toolkit Lynn Winters, Joan Herman, 2011 Lynn Winters and Joan Herman's *The Turnaround Toolkit* is written for school leaders who are focused on transforming instruction and who may be working under significant time constraints to reverse declining student achievement or public perceptions of school failure. Based on the evidence that simply implementing continuous improvement is not enough to close the achievement gap, *The Turnaround Toolkit* provides a nine-step formative evaluation program designed to achieve an immediate and consistent focus on improving instruction in order to bolster student achievement. In a straightforward and accessible fashion, Herman and Winters explain three overarching Turnaround Tasks that frame these steps and the necessary and sometimes drastic actions that must be taken by school leaders as they use data to strategically choose, implement, monitor, and revise school interventions. A dedicated online toolkit offers numerous worksheets and templates that support each stage of the process and help school leaders scaffold the work of educators to put an aggressive turnaround plan into action, while a leadership guide at the end of the book provides guidance to turnaround teams and facilitators.
