Precalculus Concepts And Graphs:

Workshop Calculus with Graphing Calculators Nancy Baxter Hastings, 2012-12-06 This project is based on the use of graphing calculators by students enrolled in calculus There is enough material in the book to cover precalculus review as well as first year single variable calculus topics Intended for use in workshop centered calculus courses Developed as part of the well known NSF sponsored project Workshop Mathematics the text is intended for use with students in a math laboratory instead of a traditional lecture course There are student oriented activities experiments and graphing calculator exercises found throughout the text The authors are well known teachers and innovative thinkers about ways to improve undergraduate mathematics teaching

Changing How We Teach and Learn With Handheld Computers Carolyn Staudt, 2005 Crystal clear examples that are rich in content and aligned to standards from a leading expert in the field Alan November Author and Consultant Create a dynamic interactive environment that extends beyond the classroom In this digital era how can educators seamlessly incorporate technology into everyday classroom use What tools will empower students promote digital equity and extend thoughtful learning The economical solution is handheld and other portable technologies In this resource educators learn how to build learning experiences that use technology to support thinking data analysis and information retrieval and sharing for standards linked learning both in and beyond the classroom *Changing How We Teach and Learn With Handheld Computers* shows how handheld computing can broaden the locales and communities in which students can grow in academic understanding These tools enable students to collaborate and network while promoting the extension of learning beyond the time and space of a classroom Carolyn Staudt a leading expert in technology integration gives educators practical applications through Surefire learning activities in all content areas Resources for downloading student friendly software Beaming and data sharing tips Step by step processes for manipulating and displaying data Field knowledge from classrooms already employing handhelds Handheld devices are already a part of the students world Now educators can embrace this technology and create a powerful learning environment that leaves no student behind

The Impact of Using Graphing Calculators as an Aid for the Teaching and Learning of Precalculus in a University Setting Carl Wallace Norris, 1994

Precalculus Franklin D. Demana, Gregory D. Foley, Bert K. Waits, Daniel Kennedy, 2004 This text intended for a graphing calculator required precalculus course shows students when and how to use concepts and promotes real understanding not just rote memorization In addition the graphing calculator is used as a tool to help explain ideas rather than merely to find answers The book reflects AMATYC MAA and NCTM guidelines and makes use of real world data in presenting a balanced algebraic and graphical approach to understanding precalculus concepts The result is a thorough preparation for the calculus course

Precalculus Mathematics Franklin D. Demana, Bert K. Waits, 1990 Introduces precalculus concepts using computer and calculator based graphing

Making the Connection Marilyn Paula Carlson, Chris Rasmussen, 2008 The chapters in this volume convey insights from mathematics education research that have

direct implications for anyone interested in improving teaching and learning in undergraduate mathematics This synthesis of research on learning and teaching mathematics provides relevant information for any math department or individual faculty member who is working to improve introductory proof courses the longitudinal coherence of precalculus through differential equations students mathematical thinking and problem solving abilities and students understanding of fundamental ideas such as variable and rate of change Other chapters include information about programs that have been successful in supporting students continued study of mathematics The authors provide many examples and ideas to help the reader infuse the knowledge from mathematics education research into mathematics teaching practice University mathematicians and community college faculty spend much of their time engaged in work to improve their teaching Frequently they are left to their own experiences and informal conversations with colleagues to develop new approaches to support student learning and their continuation in mathematics Over the past 30 years research in undergraduate mathematics education has produced knowledge about the development of mathematical understandings and models for supporting students mathematical learning Currently very little of this knowledge is affecting teaching practice We hope that this volume will open a meaningful dialogue between researchers and practitioners toward the goal of realizing improvements in undergraduate mathematics curriculum and instruction
