widespread perplexity about the social role of humanistic scholarship few disciplines are as anxious about their nature and purposes as academic theology In this important work W Clark Gilpin dean of the University of Chicago Divinity School proposes that American theological scholarship become responsible to a threefold public the churches the academic community and civil society Gilpin approaches this goal indirectly by investigating the historic social roles of Protestant theologians and the educational institutions in which they have pursued their scholarship and teaching Ranging from analyses of the New England Puritan Cotton Mather to contemporary theologians as public intellectuals Gilpin proposes that we find out what theology is by asking what theologians do By showing how particular cultural problems have always shaped

the work of theologians Gilpin's work profoundly illuminates the foundations of American academic theology providing insights that will help guide its future

**Connected at the Roots** Jerry Camery-Hoggatt, 2025-02-25 Written for beginning seminary students this interdisciplinary study argues that recent advances in the social and cognitive sciences demonstrate that knowing involves not only our physical bodies but also our tools our communities and our social institutions As important as these discoveries are for understanding general cognition they are even more important for understanding the nature of faith The Bible is rich with metaphors that emphasize the living church as a source of wisdom and spiritual depth We always need other Christians if our faith is to be both rich and deep We are like groves of aspen trees individual trees that are connected at the roots
