the last thirty years the General History of Africa marks a major breakthrough in the recognition of Africa's cultural heritage. Offering an internal perspective of Africa, the eight volume work provides a comprehensive approach to the history of ideas, civilizations, societies and institutions of African history. The volumes also discuss historical relationships among Africans as well as multilateral interactions with other cultures and continents.

Aspects of the Prehistory of the Lunsemfwa Drainage Basin, Zambia, During the Last 20,000 Years Francis Boswell Musonda, 1983

Women's Authority and Society in Early East-Central Africa Christine Saidi, 2010. This study of more than two thousand years of African social history weaves together evidence from historical linguistics, archaeology, comparative ethnography, oral tradition and art history to challenge the assumptions that all African societies were patriarchal and that the status of women in precolonial Africa is beyond the scope of historical research. In East Central Africa, women played key roles in technological and economic developments during the long precolonial period. Female political leaders were as common as male rulers and women, especially mothers, were central to religious ceremonies and beliefs. These conclusions contribute a new and critical element to our understanding of Africa's precolonial history.

This lengthy period includes the civilization of Ancient Egypt, the history of Nubia, Ethiopia, North Africa and the Sahara as well as of the other regions of the continent and its islands.

The Unity of African Ancient History Felix Chami, 2006. In one of the first studies to gather data from as many related disciplines as possible (linguistics and etymology, anthropology and rock art) and drawing on new archaeological findings and re-readings of historical documents, the author traces the contours of ancient cultural and trade links between the various peoples and polities of ancient Africa. The aim is to discern patterns of peopling and history of the continent and rediscover unknown cultural systems and dynamics of ancient sub-Saharan Africa. By demonstrating how Africa's people developed, culturally exchanged knowledge and migrated, the study challenges denials of early African cultural sophistication, setting an important agenda for future research directions.
