Preliminary Overview Of The Economies Of Latin America And The Caribbean 2004:

Preliminary Overview of the Economies of Latin America and the Caribbean United Nations Publications, 2015-12-31 This version of the Preliminary Overview of the Economies of Latin America and the Caribbean provides a development overview of the region's economy in 2014 and growth projections for 2015. *Preliminary Overview of the Economies of Latin America and the Caribbean*, 2004 This annual publication, one of the most important of ECLAC, includes official country figures up to November 30th and an analysis of developments in the region's economy in 2004 and projections for 2005. The Latin American and Caribbean economy grew by 5.5% in 2004, outstripping the most optimistic forecasts while the region's per capita GDP is estimated to have risen by about 4%. In 2005, GDP growth is projected to come in at about 4%; this rate would be high enough to bring about a further increase in per capita GDP. All the countries except Haiti turned in positive growth rates. For the second time in the past 20 years, the first time was in 1997, all of the region's six largest economies—Argentina, Bolivarian Republic of Venezuela, Brazil, Chile, Colombia, and Mexico—posted growth of over 3%. The region's strong economic performance was closely tied to developments in the international economy. World economic activity picked up speed in 2004, resulting in estimated global GDP growth of just under 4% versus 2.6% in 2003, while the expansion of world trade could top 9% versus 5.5% in 2003. The United States and China were the engines of this expansion, which contributed to the commodity price hikes that have benefited many countries of the region, especially those in South America, but have hurt the resource-poor economies of Central America and the Caribbean. The propitious international environment played a crucial role in the recovery of the terms of trade, which had already improved by 1.3% in 2003. In 2004, the region's terms of trade rose by 5.6% as a result of a 10.5% increase in export prices and a much smaller 4.7% rise in import prices. The trends observed in the prices of commodities, especially oil and metals and minerals, were a key determinant of this outcome. Higher labour demand translated into a significant increase in the generation of employment. The labour supply meanwhile grew moderately and the unemployment rate fell from 10.7% in 2003 to 10% this year. ECLAC estimates that this slight decline in unemployment, along with an incipient recovery of wage levels, contributed to the small downturn seen in the region's poverty rate from 44.4% of the population in 2003 to an estimated 42.9% in 2004. The Preliminary Overview of the Economies of Latin America and the Caribbean is an annual ECLAC publication prepared by the Economic Development Division in cooperation with the Statistics and Economic Projections Division, the Commission's subregional headquarters in Mexico City and Port of Spain, and the ECLAC offices in Argentina, Brazil, and Colombia. The report also reflects the valuable input received from the central banks and national statistical offices of the countries of the region, which provide the statistical information that serves as a basis for its preparation.

Politics Latin America Gavin O'Toole, 2007 Politics Latin America Gavin O'Toole Latin America is a region of profound cultural, social, and geopolitical diversity. From this turbulent area of the world have emerged global symbols of both revolutionary struggle and reactionary

brutality some of history's most romantic icons from Simon Bolivar to Che Guevara as well as some of the most stereotypical dictators such as Rafael Trujillo and Augusto Pinochet But why is Latin America important in the study of politics why has it taken so long to achieve democracy and how can this achievement be interpreted Politics Latin America explores the unique circumstances that have shaped political evolution in this captivating region of 20 independent countries and examines the exciting new phase in politics now underway there For the first time almost an entire region of the developing world suffering from significant levels of poverty and inequality is organized under democratic government The book explores why it has taken so long to achieve democracy in Latin America and how this development can be interpreted while also equipping students to tackle major issues of global politics by providing theoretical tools for analysing key contemporary themes such as democratization institution building or US foreign policy offering novel insights from Latin America's experience as a laboratory for political and economic experiments allowing examination of relations between countries from different cultural and political traditions enjoying starkly different levels of development illustrating the stresses and strains which can affect all democracies Latin American democracy has been and in many places is still being hard won power has often been misused and institutions have frequently failed The construction of strong stable institutions is now of paramount importance to the region's future Gavin O Toole's novel approach to Latin American politics puts these institutions at the very heart of the discipline and provides insights into both this fascinating region and global political trends Gavin O Toole is an academic and a journalist He has taught Latin American politics and democratic theory at Queen Mary University of London and held seminars at Birkbeck College and the former Institute of Latin American Studies ILAS in London He is currently Visiting Postdoctoral Fellow at the Institute for the Study of the Americas University of London Visit the Politics Chamber on the web at www.pearsoned.co.uk/politicschamber to browse a range of resources on all aspects of politics

Latin America and Global Capitalism William I. Robinson, 2008-11-24 2009 Best Book International Political Economy Group of the British International Studies Association This ambitious volume chronicles and analyzes from a critical globalization perspective the social economic and political changes sweeping across Latin America from the 1970s through the present day Sociologist William I Robinson summarizes his theory of globalization and discusses how Latin America's political economy has changed as the states integrate into the new global production and financial system focusing specifically on the rise of nontraditional agricultural exports the explosion of maquiladoras transnational tourism and the export of labor and the import of remittances He follows with an overview of the clash among global capitalist forces neoliberalism and the new left in Latin America looking closely at the challenges and dilemmas resistance movements face and their prospects for success Through three case studies the struggles of the region's indigenous peoples the immigrants rights movement in the United States and the Bolivarian Revolution in Venezuela Robinson documents and explains the causes of regional socio political tensions provides a theoretical framework for understanding the present turbulence and

suggests possible outcomes to the conflicts Based on years of fieldwork and empirical research this study elucidates the tensions that globalization has created and shows why Latin America is a battleground for those seeking to shape the twenty first century s world order

Preliminary Overview of the Economies of Latin America and the Caribbean United Nations,2005-04 This annual publication examines the economic performance of the Latin American and Caribbean region as a whole and of individual countries for 2004 and the outlook for 2005 Findings include that the regional economy grew by 5.5 per cent in 2004 outstripping the most optimistic forecasts whilst the regional per capita GDP rose by about four per cent In 2005 GDP growth is projected to be about four per cent

Economic Survey of Latin America and the Caribbean United Nations. Economic Commission for Latin America and the Caribbean,2015-01-29 The Economic Survey of Latin America and the Caribbean 2014 looks at how economic growth in the region has been slowing since 2011 and the data available for the first six months of 2014 indicate that the region will not match the growth rate of 2.5% recorded in 2013 Growth has been muted over the first few months of the year owing to stagnant gross fixed capital formation and faltering private consumption Government consumption on the other hand has picked up and the net contribution of exports has been more positive than during the same period of the previous year A regional growth rate of 2.2% is forecast for 2014

Preliminary Overview of the Economies of Latin America and the Caribbean. 2000 United Nations,1999 The economic recovery of the Latin American and Caribbean economies that began in the final quarter of 1998 continued during the year 2000 and the region s GDP after coming to a virtual standstill the year before grew 4% The main engine of this recovery was an export boom while domestic demand was weaker than expected Partly because of that weakness the region s brisker

growth rate was not reflected in any appreciable decrease in unemployment which remained at nearly 9% and real wages rose very little Thanks to the export boom the region was able to narrow the deficit on its balance *Foreign Direct Investment in Latin America and the Caribbean 2008* United Nations,2010-01-26 The Foreign Relations of the United States series presents the official documentary historical record of major U S foreign policy decisions and significant diplomatic activity The series which is produced by the State Department s Office of the Historian began in 1861 and now comprises more than 350 individual volumes The volumes published over the last two decades increasingly contain declassified records from all the foreign affairs agencies **CEPAL Review** ,2011 **Latin America and the Caribbean** ,2006 This publication is an interactive graphical version of the main Economic Projections Document which provides access to the individual growth projections for the countries in the region Publisher s description **Annotated Provisional Agenda and Organization of the 31st Session** ,2006 **Trade and Development Report, 2004** ,2004 This annual report considers trends and prospects for the global economy and the international trading system capital flows and finance issues The second part of this year s report focuses on issues of policy coherence in development strategies international trade and globalisation It examines how trading relations are affected by international monetary and financial systems and how financial and monetary instability can affect the capacity of developing countries to participate successfully in the international trading system It also discusses exchange rate management at national and international levels and its contribution to job creation and poverty reduction *United Nations Documents Index* ,2007
