Prematurity In Scientific Discovery On Resistance And Neglect:

Prematurity in Scientific Discovery Ernest B. Hook, 2002-10-02 For centuries observers have noted the many obstacles to intellectual change in science In a much discussed paper published in Scientific American in 1972 molecular biologist Gunther Stent proposed an explicit criterion for one kind of obstacle to scientific discovery He denoted a claim or hypothesis as premature if its implications cannot be connected to canonical knowledge by a simple series of logical steps Further Stent suggested that it was appropriate for the scientific community to ignore such hypotheses so that it would not be overwhelmed by vast numbers of false leads In this volume eminent scientists physicians historians social scientists and philosophers respond to Stent's thesis

Der blinde Fleck Ulrich Frey, 2013-05-02 Wir machen immer wieder Fehler auch in der Wissenschaft Diese Arbeit zeigt da Wissenschaftler bestimmte Denkfehler kaum vermeiden können verblüffenderweise unabhängig von Disziplin oder Epoche Woher kommt dieser blinde Fleck Und kann man vielleicht doch etwas dagegen tun Die durch die Kognitionspsychologie erforschten häufigsten Fehler werden in Fallstudien aus Physik Biologie Medizin und Psychologie nachgewiesen und ihre Ursachen wissenschaftstheoretisch analysiert die Strukturgleichheit ist erstaunlich

History, Theory and Philosophy in Archaeology Tim Murray, 2025-02-03 This collection of essays the bulk of which have been previously published by Emeritus Professor Tim Murray ranges widely across contemporary archaeological theory and the history of archaeology while retaining a focus on the archaeology of Australia The collection is introduced by a new essay The evolution of archaeological theory that sets the agenda for the collection In doing this Murray explores the critical intersection between archaeology philosophy and the social and cultural context of its practice in Australia and elsewhere The collection brings together ideas about time scale and strategies for the evaluation of archaeological concepts and categories which are then applied to an understanding of significant issues raised by writing the archaeology of Australia from the Pleistocene to the present The essays have been drawn from over 30 years of research and writing about archaeological inquiry into the theories and methods of the discipline and will be of particular interest to archaeologists historians the managers of archaeological heritage and advocates of the importance of indigenous perspectives on the histories of post colonial societies

The Sasquatch Paradox Levi Machovec, 2022-02-10 There is a problem in the scientific community They are more than happy to debate those who believe the Earth is flat Yet when one brings up Sasquatch they quickly ignore the subject and shun anyone in the scientific community who does look into the evidence The Sasquatch paradox shows that the scientific community does not live up to its ideal We should not be surprised at this fact as this has been the case since the scientific revolution And so the question remains and the scientists still haven't provided an adequate answer to this one fundamental question What is leaving ape footprints in the woods of North America *Thinking about Science* Ferric C. Fang, Arturo Casadevall, 2023-10-31 Thinking about Science Good Science Bad Science and How to Make It Better A riveting exploration of the world of science diving headfirst into its triumphs and tribulations Penned by

seasoned microbiologists Ferric C Fang and Arturo Casadevall this book offers a comprehensive analysis of the scientific enterprise through various lenses including historical philosophical and personal From their unique vantage points as researchers clinicians and educators Fang and Casadevall dissect the intricate mechanisms of science shedding light on its strengths and weaknesses Through engaging historical anecdotes personal narratives and insightful academic studies they present a candid evaluation of science s performance including a thought provoking examination of its role during the COVID 19 pandemic A must read for anyone curious about the present predicaments and future potential of science Thinking about Science Good Science Bad Science and How to Make It Better is more than just a book it s a roadmap to understanding and improving the scientific endeavor for the benefit of society at large The authors have given us a thoughtful description of science and the joy of discovery an unflinching diagnosis of where improvements are needed and recommendations for remedies well worth considering Scientists science and society would benefit if this book were read by both future and established scientists as well as the administrators policymakers and regulators who are in a position to help us do better Michael Kalichman UC San Diego With a deep understanding of the profound impact of science on society the authors provide thought provoking perspectives on changes in the scientific enterprise that will support sustainable equitable practices and engender public trust An engaging read for everyone with an interest in science or science policy Stanley Maloy San Diego State University

International Handbook of Research in History, Philosophy and Science Teaching Michael R. Matthews, 2014-07-03 This inaugural handbook documents the distinctive research field that utilizes history and philosophy in investigation of theoretical curricular and pedagogical issues in the teaching of science and mathematics It is contributed to by 130 researchers from 30 countries it provides a logically structured fully referenced guide to the ways in which science and mathematics education is informed by the history and philosophy of these disciplines as well as by the philosophy of education more generally The first handbook to cover the field it lays down a much needed marker of progress to date and provides a platform for informed and coherent future analysis and research of the subject The publication comes at a time of heightened worldwide concern over the standard of science and mathematics education attended by fierce debate over how best to reform curricula and enliven student engagement in the subjects There is a growing recognition among educators and policy makers that the learning of science must dovetail with learning about science this handbook is uniquely positioned as a locus for the discussion The handbook features sections on pedagogical theoretical national and biographical research setting the literature of each tradition in its historical context It reminds readers at a crucial juncture that there has been a long and rich tradition of historical and philosophical engagements with science and mathematics teaching and that lessons can be learnt from these engagements for the resolution of current theoretical curricular and pedagogical questions that face teachers and administrators Science educators will be grateful for this unique encyclopaedic handbook Gerald Holton Physics Department Harvard University This handbook gathers the fruits

of over thirty years research by a growing international and cosmopolitan community Fabio Bevilacqua Physics Department University of Pavia

Educational Research: Why 'What Works' Doesn't Work Paul Smeyers, Marc Depaepe, 2007-01-07

Education and educational research according to the current fashion are supposed to be concerned with what works to the exclusion of all other considerations All over the world and particularly in the English speaking countries governments look for means of improving student achievement as measured by standardized test scores Although such improvements are often to be welcomed they do not answer all significant questions about what constitutes good education Also the research on which they are based is not the only legitimate way to do educational research Social research and therefore educational research cannot ignore the distinctive nature of what it studies a social activity where questions of meaning and value cannot be eliminated and where interpretation and judgment play a crucial role In this book distinguished philosophers and historians of education from 6 countries focus on the problematical nature of the search for what works in educational contexts in practice as well as in theory Beginning with specific problems they move on to more general and theoretical considerations seeking to go beyond over simple ideas about cause and effect and the rhetoric of performativity that currently has educational thinking in its grip Freedom of inquiry in educational research can no longer be taken for granted Narrow definitions of what constitutes scientific research funding criteria that enforce particular research methods and policy decision processes that ignore any research that is not narrowly utilitarian create a context in many countries that discourages scholarship of a more speculative exploratory or critical sort This book brings together an exceptional combination of international and cross disciplinary scholars who bring the perspectives of history and philosophy of science to ask How did we arrive at this place and Where is educational research heading The book illuminates the anti intellectual consequences of a what works mentality in education and shows that the ostensibly scientific revolution in educational research in fact reflects an ahistorical and conceptually muddled understanding of what actually constitutes science This book could not be more timely and important Nicholas C Burbules Grayce Wicall Gauthier Professor University of Illinois With research increasingly tied to State policies with the instrumental purpose of guiding school reforms the volume provides an important historical and philosophical questioning of the possibilities limitations and challenges of education research Internationally leading scholars engage in a significant conversation that is sophisticated and nuanced for understanding contemporary debates Thomas S Popkewitz the University of Wisconsin Madison USA This publication is realized by the Research Community FWO Vlaanderen Research Foundation Flanders Belgium Philosophy and History of the Discipline of Education Evaluation and Evolution of the Criteria for Educational Research
