## **Random Thoughts Of A Liberal Man:**

*Random Thoughts of A Liberal Man* Siva Ratnam, 2004-06 This book came out of the emails I sent to a group of people some relatives and some friends I became a liberal in the American sense through the influence of the counterculture and these are my opinions and thoughts as a liberal man The American liberal is very important to the world just as the environmentalists and anti globalization activists are very important to the world The world is in crisis in various aspects of its existence and life on it This crisis political environmental social etc was brought upon the world by the Western industrial civilization That civilization has to be questioned cautioned and some elements of it have to be completely opposed That opposition has to come from the West itself and such mass scale opposition originated in the 60s in America England and Europe Today the opposition to the destructive forces is centered in the liberal consciousness **Thinking Like a Political Scientist** Christopher Howard, 2022-12-22 A compelling case for transforming how research methods are taught to undergraduate students of political science London School of Economics Review of Books Each year tens of thousands of students who are interested in politics go through a rite of passage they take a course in research methods Many find the subject to be boring or confusing and with good reason Most of the standard books on research methods fail to highlight the most important concepts and questions Instead they brim with dry technical definitions and focus heavily on statistical analysis slighting other valuable methods This approach prevents students from mastering the skills they need to engage more directly and meaningfully with a wide variety of research With wit and practical wisdom Christopher Howard draws on more than a decade of experience teaching research methods to transform a typically dreary subject and teach budding political scientists the critical skills they need to read published research more effectively and produce better research of their own The first part of the book is devoted to asking three fundamental questions in political science What happened Why Who cares In the second section Howard demonstrates how to answer these questions by choosing an appropriate research design selecting cases and working with numbers and written documents as evidence Drawing on examples from American and comparative politics international relations and public policy *Thinking Like a Political Scientist* highlights the most common challenges that political scientists routinely face and each chapter concludes with exercises so that students can practice dealing with those challenges **Lectures to Young Men, on Various Important Subjects** Henry Ward Beecher, 2024-06-10 Reprint of the original first published in 1876 *Thou Art the Man* Mary Elizabeth Braddon, 1894
